### Subscription Rate Increase Announced

Increased costs in publishing a newspaper must be absorbed in one of two ways—increasing the price of the product or cheapening the product itself. We feel certain that you would not be satisfied with the latter.

Effective September 15, 1937, the subscription rate of Washington county's two official newspapers will be advanced from \$1.50 per year to \$2 per year in advance.

The great percentage of weekly newspapers in the United States are sold and have sold at \$2 per year, or more, for several years. A subscription rate advance to equal charges elsewhere will assure maintaining and improving the present high quality of your county newspapers.

Take advantage of this opportunity to get a \$2 newspaper for \$1.50. Renew your subscription before September 15, 1937. Remember—regular use of the advertising pages will result in savings that will more than pay your subscription costs.
