**All-Steel Hoppers---**  
**An Important Improvement in McCormick-Deering Grain Drills**

McCormick-Deering 14-7 Grain Drill.

**ALL-STEEL Hoppers**—that's the big drill news now. Come in and let us show you this real improvement in a real line of drills. They will drill more accurately and last longer than ever before because the steel hoppers combine with the strong steel frame to hold the feeding mechanism in correct alignment.

The new hoppers on these McCormick-Deering Drills will not sag, warp, split, or rot—they are made of rust-resisting, heavy-gauge steel containing copper. They are water tight and grain tight—you can pour grain into them without spilling it on the ground.

Improvements have been made in the feeds, too, and there are roller bearings in the fully enclosed end axle boxes. Whatever kind of drill and attachments you want, we can furnish it.
