McCormick Deering FARM EQUIPMENT

Wouldn't This Be a Good Tractor for Your Orchard Work?

IT IS the McCormick-Deering Model O-12, an important new development in the orchard power field... with the experience and reputation of the world's largest tractor builder as a background. We are proud of this compact, economical little tractor. It is built to pull one 16-in. or two 10-in. plows, but in many cases its performance goes far beyond this range. And it operates all day long on one gallon of fuel or less per hour. For use in old orchards, or wherever conditions call for a narrow, compact tractor of this size, the new O-12 has many decided advantages. The McCormick-Deering line also includes wheel-type and crawler tractors in larger sizes for use where more power is required. Come into our store and see the O-12.
