

School Finances Topic of P.-T. A. Session Monday

Source of school funds and the manner in which they are spent was explained by school supervisors at the meeting of the Hillsboro Parent-Teacher association Monday night at the high school.

A comparison of budgets for the past three years and the general financial status of the union district was described by B. M. Goodman, principal of the high school.

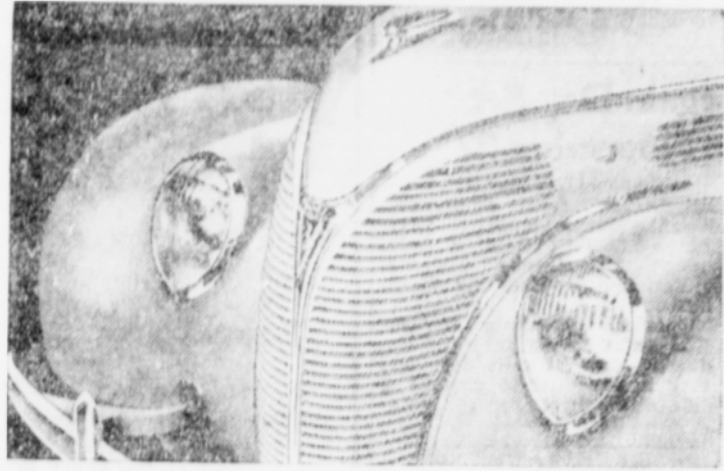

J. W. Poynter, grade school superintendent, told of grade school budget items and the trends in financing public education throughout the nation. In answer to questions, he also explained the new policy in grading in the local schools. Speakers were introduced by T. G. Bronleewe, who was in charge of the evening's program.

Peter Boston school received the award for having the most parents visit during National Education week.

Miss Maurine Moore sang, accompanied by Mrs. Kittie Mae Crockett. Group singing was led by Mrs. L. C. Kramm.

Mrs. J. M. Person reported on publications and told of the new book display at the public library. Mrs. George Reule reported on the

Front View of New DeLuxe Ford

Ford will produce two distinctive V-8 cars for 1933 according to advance word received here. The cars will differ in appearance, appointments and price. The deluxe car, front of which is shown above, will be produced in eight body types while the standard car will be available in three.—Cut courtesy The Oregonian.

completion of the summer round-up of children. Mrs. P. A. Anderson announced the P.-T. A. enrollment as 119 to date. Mrs. Roy Burnett explained the subscription offers of the National Parent-Teacher magazine and announced that it is the

only official magazine of the national association. Refreshments were served by a committee including Mrs. F. L. Davidson, chairman, Mesdames R. H. Easter, Glen Campbell, T. G. Bronleewe, Kittie Mae Crockett, Rutledge, Heacock, D. E. Wiley, A. H. Busch, and Miss Hila Cornelius.

Supt. B. W. Barnes Speaker at B. P. Club Friday Night

Superintendent B. W. Barnes of the Hillsboro Union high school will give a talk on "Schools at the meeting of the Business and Professional Women's club at the chamber of commerce Friday night. G. Russell Morgan will be the soloist and special musical numbers will be presented by Mrs. Fred Sewell. A short program on "Our Town's Business" will be presented by the program committee—Mesdames Marie Hoffman, Wilma Hall, Margaret Mosberry, and Misses Gladys Rood, Marie Hougeau, and Georgina Brown.

Twenty-five members of the McMinville club will attend the meeting according to word received from that city.

Dads' Day at "U" December 3 and 4

"Dads' Day" of University of Oregon students from Hillsboro have been invited to come to the Eugene campus, December 3 and 4, for what their sons and daughters enthusiastically declare will be the greatest "Dads' Day" week-end in the history of the fathers' club. This year the entire week-end will be given over to showing "dad" a good time and giving him a chance to see the University's new buildings, since no other major campus events are scheduled at this time. It is stated by William Cummings, Medford, chairman.

For the first time in many years the week-end's program will be designed so that fathers may have a maximum of their time with their sons and daughters. Numerous entertainment features are planned, they will be such that "Dad" and students can go to them together.

In the Window--

A potato that would make a meal for a family of half a dozen occupies the place of honor in the Argus window this week. With it are two others almost as large, all of the Early Rose variety. They were grown by C. S. Webber of Hazeldele.

A huge double-yolked goose egg vies with the potato in unusual size. It was contributed by E. E. Rowland, Smith-Hughes instructor. A Nerima Long radish, 2 feet long and weighing 8 pounds, grown by W. L. Persons of Pumpkin Ridge, is also displayed.

Sales tax tokens from the states of Colorado, Missouri, Kansas and Washington are shown. They are from the collection of Russell O'Rear of south of Hillsboro.

Local Happenings

A card received by his co-workers at the Argus office from Verlin I. Cochran, who left San Francisco November 9 for Honolulu, says: "Three hours at sea from Frisco. Had fine trip down. Visited Crater lake, and found one inch of snow on ground, more falling. Saw San Francisco last night. Cloudy, cool at sea, but fine on shore."

Mr. and Mrs. E. G. Paine and Donald Wick who took V. L. Cochran to San Francisco to sail for Honolulu, returned home Saturday night. They report a fine trip and that they saw all the sights of San Francisco and en route.

Mr. and Mrs. Carl Palo of Kalamazoo, Wash., spent the week-end with Mr. and Mrs. John W. Kamna.

Mrs. E. Fayette Allen visited friends in Tacoma over Armistice day. Miss Martha Zanow of Portland visited her mother, Mrs. Bertha Zanow, this week.

Maintenance Fall and Winter Egg Production Important

L. E. Francis, Assistant County Agent

Eggs produced from September to February are generally among the most profitable to the poultrymen, stated N. L. Bennion at the monthly poultry meeting in the Beaverton high school November 9. Bearing this fact in mind, one of the principal problems in egg production that the poultryman has to contend with is maintaining fall and winter egg production.

Bennion pointed out that some of the major factors affecting fall and winter egg production are the time of hatching, care of the birds during the growing season, laying house conditions, feeding, and the use of artificial lights. He pointed out that early and late hatched chicks generally present problems to the poultryman such that it is usually not wise to order birds from one of these groups. March and April hatched chicks generally give the best results.

Time for Housing Pullets should be housed before they are in heavy production. This is necessary so that the birds can become accustomed to using nests for laying and become thoroughly acquainted with the surrounding conditions. Housing the birds at the proper time will do away with considerable floor laying.

Changing from the growing feeds to the laying feeds should be made gradually as abrupt changes have an undesirable effect on the birds.

Bennion also pointed out that the proper type of laying house is an other factor and one that is frequently neglected. The laying house should be properly insulated against heat and cold. Adequate ventilation should be provided. Three square feet of floor space should be provided for Leghorn hens, and four square feet for heavy breeds. Nests at the rate of one to every five birds should be provided.

Adequate hopper space is also vital. One foot should be allowed for each four birds. Clean, fresh drinking water should always be available and in the colder months, the water should be warmed to make it more palatable. One foot of drinking water should be furnished for every twenty birds, and finally, adequate roosting space must be arranged by allowing six inches per bird for Leghorns and eight inches for the heavier birds.

In the subject, broad enough in its scope to warrant a separate discussion, mentioned Bennion. Consequently, only a brief mention was made of it in its relation to winter egg production. The mash should contain the necessary grain constituents along with bone meal, minerals, and in some instances, milk and cod liver oil. The scratch should be made up of corn, wheat and barley, or a combination of any three. Oyster shell and grit should be available to the birds at all times. Green feed is vital in the poultry feeding program and should be furnished to the birds in proper amounts. Alfalfa, kale, and carrots constitute the major source of green feed in this district.

Light Practices Vary There is considerable variation in the practices involved in connection with the use of artificial light, pointed out Bennion. Generally speaking, however, either morning or evening lights may be used or both. By means of the lights, a 12 to 14 hour day should be provided. In the event that the evening lights are used, it is particularly important that the birds not be fed their evening scratch feed until just before time to go to roost; otherwise the birds will eat and go to roost immediately and the lights will be of no particular avail.

Some poultrymen make the practice of using all night lights. This is generally not advisable, cautioned Bennion, because it tends to force the birds out of production during the spring and summer months. In the event that the poultryman is desirous of forcing the production of his flock of birds with the idea of disposing of them in the spring or early summer, all-night lights are desirable.

As a final caution to the poultrymen, Bennion pointed out that all of the factors that he had discussed with regard to fall and winter egg production are secondary to the one important factor which is that of inheritance. It is impossible through management to make birds produce at any time of the year unless they have first inherited the ability for high egg production.

Following Bennion's discussion, Ambrose Brownell, poultryman from Milwaukie, and president of

Mrs. Perkins Honored—Mrs. Fred Cornelius entertained with a surprise birthday party for her niece, Miss Virginia Perkins, at her home Tuesday evening. Guests present were Misses Dorothy Challacombe, Beulah Shattuck, Lenore Sherman, Alma Eslinger, Dorothy Barr, and the honor guest, Miss Perkins.

Doane Injured—Frank Doane severed the index finger from his left hand while changing wood Armistice day. Dr. D. E. Wiley attended him.

Mrs. Poole Breaks Wrist—Mrs. E. B. Poole fell Armistice day, breaking her right wrist. Dr. J. O. Robb attended her.

Sewell Cuts Hand—James Sewell of northeast of Hillsboro cut his right thumb badly in a wood saw Saturday.

Misses Helen Dean and Doris Weber, students at Willamette university, Salem, spent the week-end with their families here.
