Portland's Mayor Talks at Chamber

ignorant of our local business interests and poorly equipped to handle our problems. Why can't we have some of our own men used in this connection.

"Many of our wisest labor leaders are coming to the realization that the Wagner act is taking away freedom from labor. Under the act, today one outfit can be set up as bargaining agent, and tomorrow it may be someone entirely different."

Bonneville Power Discussed
In the first part of his talk, Carson turned to discussion of the Bonneville power situation, reporting on several of his findings on a recent trip to Washington, D. C.

"It is up to us in the northwest to dispose of Bonneville power as rapidly as possible," he asserted, "if we are to hold the favor of congressmen from other parts of the country. At present there are only two units in the dam's power set-up. We must dispose of it right away, otherwise it will be labeled a 'white elephant' and will do more damage to the section than good. We must show ability to consume the product and begin paying for the cost of the dam."

"There are only three power rivers in the United States—the Tennessee, Colorado and Columbia, and the Columbia can develop more hydroelectric energy than the other two put together. Before a pick was stuck in the ground at the Boulder dam, every bit of power that is produced there had been contracted for. To date, not one contract for use of Bonneville power has been signed. So it is up to us to sell it quickly, but to be sure at the same time we don't let our investment bankers handle the deal, and saddle the public with all kinds of costs, fees and funds. Since the dam is now under construction, it must be demonstrated to congressmen that it is a worthwhile proposition."

Fear felt in some quarters that the city of Portland would possibly take over both the Northwestern Electric company and the Portland General Electric company and thus dictate prices to surrounding communities was dispelled by Carson. The city holds an option to purchase the Northwestern organization, he said, but in the event both companies eventually would be taken over by the city of Portland, it wouldn't be for the purpose of exploiting surrounding towns.

"Portland was made a trade center not by the people who live there, but by those of the surrounding territory," he said, indicating that Portland must serve as well as be served by the surrounding district.

The largest crowd in recent months attended the noonday luncheon to hear the Portland mayor's talk. Mayor J. H. Garrett, acting as program chairman.
