Star Barn Equipment

Free Refreshments for all Visitors

County-wide acceptance of the outstanding farm implements and equipment handled by this dealership has made it necessary for us to seek larger quarters. We appreciate the patronage that has made this expansion possible and we promise you an even larger display of units, more complete stock of repair parts, greater convenience and the best possible service.

Be our guests Saturday, March 5. See our new quarters. Examine the new farm implements that have never been shown in Hillsboro before. Come in—make yourself at home—and enjoy yourself.

New Oliver Hart-Parr "80" Tractor

See this sensational new addition to the well-known line of Oliver Hart-Parr tractors that lead the world in the field with the most modern farm power unit built. This new Oliver Hart-Parr "80" (illustrated at the top of this advertisement) is designed to produce 3-plow power and is built in two fuel types: HC for Gasoline and KD for Kerosene or Distillate.

Power, economy, dependability and performance are built into this new unit. High compression valve-

in-head motor variable speed governor, braking-steering through Oliver differential brakes, ample belt power, detachable belt pulley, force-feed lubrication, wide adjustable drawbar and long-wearing parts are features of the Oliver Hart-Parr "80." The easy-to-get-at-design of the "80" is equally important.

Check the specifications of the new "80" against any other 3-plow unit. Or if you prefer to judge from performance, ask for a demonstration.

SEE THESE FARM IMPLEMENTS NEVER SHOWN BEFORE on Pacific Coast

OLIVER Roll-Over Spring-Tooth Harrow

This new spring-tooth harrow can be cleaned without stopping the tractor or getting off the seat. Simply pull the trip rope—the teeth turn over and clean themselves. Another jerk of the rope and the teeth complete the full revolution, ease back into the soil and go to work.

This new development makes the spring-tooth harrow more useful and convenient to operate from tractors.

OLIVER RB-OSX Roller Bearing Offset Disc Harrow

Designed and built to stand up under unusually hard work in fields and orchards—a harrow heavy enough to penetrate hard ground and yet one that will pull unbelievably light, rolling as it does on its new anti-friction roller bearings.

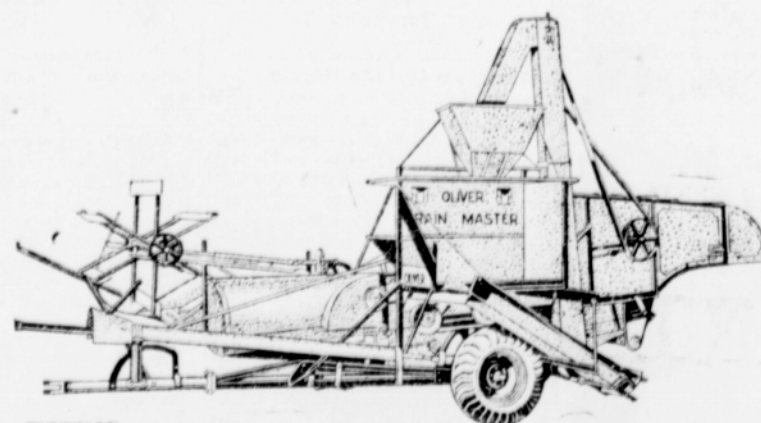

Other features of this new implement include wide range of adjustments, disc gangs that can be quickly set to any desired angle, and efficient disc gang leveling device.
