ASK THIS QUESTION when you buy a TRACTOR*
Does it have the traction I need?
A

The "Caterpillar" track-type Tractor lays its own steel "cog tracks" wherever it goes. It's actually geared to the ground. On the "Caterpillar" D2 Tractor (the 3-4 plow model) for example, its rugged 25 HP engine braces its pull against 18 wide grouser, 9 on each track. There is no power-wasting slippage. And the broad tracks spread the tractor's weight over a wide area so the soil is not packed. Come in and let us tell you more about positive traction.

*This is the third in a series discussing important points to remember when selecting a tractor.
