Thirteen years ago—in 1928—the old sections of Washington county's historic courthouse building were torn down to permit completion of the modern structure we know today. The right-hand third of the building is the "annex" built in 1912. "And speaking of pictures," the above scene is one well within the memory reach of all of us. The picture was taken during the "big snow" of January, 1937, when drifts piled high throughout the county, stalling traffic and temporarily isolating some communities. News then... remember when? (Ed. Note: This is the concluding picture in a series tracing the historic development of Washington county's courthouse.)

Notice TO OWNERS OF TODAY'S HIGH COMPRESSION CARS

As your new car piles up mileage, your high compression engine increases in compression. Even inside the first 10,000 miles, tests show, this increase can cause knocking and engine sluggishness. And this can happen to any car on the market today.

The cause of this is carbon—which cokes inside today's compact combustion chambers, reducing their size. You can't avoid such carbon deposits completely, no matter what kind of gasoline or oil you use.

Shell scientists have developed a special type of gasoline—Shell Premium—which will automatically compensate for these carbon-created higher and higher compressions.

This super motor fuel will produce maximum knock-free power in the highest compressions your engine can develop. Because Shell Premium is a special blend of clean-burning gasoline fractions... a patented, scientifically prepared anti-knock compound... and powerful alkylate (similar to that used in 100-octane aviation fuels).

Whether your car is new or old, Shell Premium will give you greater power when you want it... new handling ease in traffic... cooler running. And to top all this, excellent mileage.

Shell Premium costs 2¢ more than "regular." But if you drive the average amount, Shell Premium will cost you only about \$1 a month extra. We recommend Shell Premium for the extra miles of new-car performance it can give you. On sale at Shell Dealers and Shell Stations.
