McCluey Naval Aviation Cadet
With a taste of aviation through the civilian pilot training program, LeRoy J. McCluey, 21, of Hillsboro, decided to go all out for aviation and has enlisted as a United States naval aviation cadet, word received from the office of Commander Bert H. Croughen, senior member of the naval aviation cadet selection board for the Thirteenth Naval District, Toledo, Ohio.

He is the son of Mrs. Ruby McCluey. The naval cadet was graduated from Hillsboro union high school in 1941, after winning a letter in track and football and playing with the school band. Then he attended Pacific university in Forest Grove for one and one-half years. While there he took his Civilian Pilot Training and became interested in aviation. He has been interested in Boy Scout work for many years and reached the rank of a Sea Scout with the Hillsboro troop.

His training toward the golden wings of a naval flier will start with an assignment to St. Mary's College in Moraga, Cal., for three months of study of subjects vital to aviation and participation in the physical development program. From there he will go to naval aviation bases for nearly nine months of training in flight and ground operations with all types of naval fighting planes. Upon completion of the course, which is open to all qualified high school graduates between the ages of 18 and 26 years, he will become an ensign in the navy or a second lieutenant in the Marine Corps.

Collections in Unemployment Fund at Record

Record collections of more than \$3,000,000 in the past 30 days, continuation with daily benefits of \$2.71, lowest monthly payments yet received, has increased the total fund of the State Unemployment Compensation Commission to \$22,850,000, a gain of nearly nine million or 64 per cent in the past year.

With war-time industry expanding contributions during 1942 have passed the \$8,000,000 mark. Taxes paid in the entire year of 1941 were \$9,797,853.

Emergency labor demands have cut unemployment claims to about 700 a week. For the year payments are \$1,775,915, a decrease of \$366,843 from the same period of 1941. July benefits dropped 75 per cent from last year's \$171,602.

Although the trust fund has gone well above earlier estimates of a safe reserve, officials point out that increased employment has nearly doubled the liability for benefits in case of a post-war slump or a temporary production let-down.

By drawing the \$240 maximum, a third of Oregon's 350,000 covered workers could draw the entire reserve in one year. Last week less than a third of one per cent were making benefits, and only 64 filed new claims. 15 of these came from other states. Maximum payments have gone to 6,791 workers this year.
