JAP BOMBS OF 1943

This is No. 1 in a series of 5 consecutive daily articles on the bombs now in actual use by our enemies, and the way to handle them. The Oregon State Defense Council emphasizes the fact that there is no assurance that some other type of bomb may not be used in any attacks made on the Pacific Coast but those pictured and described here are the most recent types used by the Japs on other fronts.

1 Kilo Jap Incendiary

The one kilogram incendiary bomb is pear-shaped and tapers toward the tail. It is 10 inches long and 3 inches in diameter and the body of the bomb is black while the tail fins are white and its nose is a hemisphere of rubber. When it is dropped it explodes and its fragments are like shrapnel and fly up to 50 yards. It scatters red phosphorus which will not re-ignite upon exposure to air as white phosphorus does, provided only that you extinguish the fire once. Used in dry forests or fields this type of incendiary material can be quite effective.

Drive to License All Dogs in County Begins

A drive to see that all dogs in the county are licensed has been started by the Washington County Dog Control Board. Cards are being sent out to all residents who purchased dog licenses in 1942 and have not secured one for 1943 on the assumption that they "still have a dog." The cards call attention to the license fees and penalties when not paid by March 1.

From where I sit...
by Joe Marsh

After that Western thriller at the movies, Ben Ryder says: "You know, the West wasn't all like that. While the gun-play was going on, respectable folks were weeding out undesirable elements... red-eye sploons and gambling joints."

And Ben's right. There's a spirit in America that's always working for a better community. Take that "clean up or close-up" program of the brewing industry, for instance. Its whole purpose is to see that beer

is sold only in clean, respectable places. Everybody benefits from cooperation like that, even folks who want Prohibition back. Because those beer folks are working for the same thing—a decent, law-abiding community.

From where I sit the way isn't to pass more laws, but to enforce the ones we've got—and rely on America's spirit of tolerance and cooperation.
