Dan Harmon for Congress
The Republican Party promises the people a positive progressive program. To be consistent with such a program, the Republican Party must elect a "Progressive Congressman" from this district. DAN HARMON is such a man.

He is a successful business man and bonafide farmer, the first such man to represent us in Congress for over fifty years.

To re-elect the same old crowd of political wheel-horses to Congress would be most inconsistent with the Republican program of progressiveness.

Do we want success or seniority?
