THE OLD JUDGE SAYS...
"Yes, I'm afraid there's no denyin' it, Judge... jeeps and trucks and other kinds of motorized equipment have taken the place of the good old horse in modern warfare."
"It's true of lots of things in this war, Eben. Every day we hear of new tactics and requirements and new uses of products. For instance, take the alcohol that is used for war purposes. In World War I, this vitally needed product was used mostly in making smokeless powder, chemical warfare materials and medical supplies. Today it must be for more... it must provide the base for such indispensable products as synthetic rubber, water-proof glass, lacquers, plastics and many other of our requirements so essential to victory."
"As a result hundreds of millions of gallons are required every year... half of which is being produced by the beverage distilling industry. Bet you didn't know that, Eben."
"As a matter of fact, I didn't, Judge. That's a mighty important war contribution that had escaped me completely."
