Trappers May Get Less for Fur Pelts

Advance information indicates that trappers will receive less this year for pelts of fur-bearing animals, according to the state game commission. Muskrats are reported to be off 20 to 30 per cent, mink 30 per cent, and marten 25 per cent.

Animals with long fur such as coyotes, bobcats, raccoon and skunks will be very hard to sell as most warehouses already are loaded with them and about the only dealers who will be in the market for such pelts will be those with available storage facilities. It is realized that election years frequently affect the fur market and it is possible that with the election over there will be more activity on the exchanges.
