It's a cinch that everyone who wants a new car this year won't get one. And there's a good reason—the demand has never been so great.

But the industry plays fair and square with the factory-franchised dealers.

The new cars produced are wisely distributed to dealers throughout the nation on a fair proportionate basis.

...and we in turn play fair with our customers, painstakingly seeing that our share of the new cars is equitably distributed and delivered on a fair price basis.

It's just good sense to "play the game" this way... serving YOU, our supplier, our community and above all ourselves in the way that is right, the way that is best... just as it's always good sense to drive a SAFE car—

for SAFETY'S SAKE have your car mechanically checked, regularly.
