Tucker Corporation Announces
GLENN HARRIS TUCKER SALES
as Dealer of the

Tucker

The first completely new car in 50 years

Completely New? Yes! For years you've seen cars gradually improved through annual model changes. But in this car you step into an entirely new automotive age...years and years ahead of conventional cars in performance, in economical operation, in safety, and—mark this—in value, too.

The Tucker has dozens of exciting engineering features, any one of which would be a major model change in a normal year... features completely new, yet completely proved in fifteen years of rigid tests.

The Tucker is a longer car and more luxurious than others in the medium price field. It is only five feet high from road to roof. It has, not 100, not 120, but 166 horsepower of smooth, effortless rear-engine power.

And what a joy to drive! No engine heat, fumes, or noise flowing back through the passenger compartment, because the engine is in the rear. Ordinary traction jolts and jars either eliminated or unbelievably softened by the exclusive new rubber torsional wheel-suspension. A car, at last, with solid four-wheel stability, geared to the road.

Pilot models are already on the road. Production of cars will follow soon. Be among the first to learn about this exciting new car. You owe it to yourself to get acquainted with a car so completely new in line and design... so completely new in engineering principles... that it will still be a leader many years and thousands of miles from now.

The New TUCKER will be shown in Portland for five days at these locations:

Tuesday, August 17, at the Rollerdom at N. E. 53rd and Sandy
Wednesday, August 18, at the Armory at N. W. 10th and Couch
