Is It Costing You Money to Save Money on Egg Mash?

A Leghorn hen eats about 40 lbs. of Larro Egg Mash a year. Therefore, 1 ton of Egg Mash will normally feed 50 laying hens for 1 year. 50 hens x 1 more egg per month = 50 extra eggs per month. 50 extra eggs per month x 12 months = 600 extra eggs per year from 1 ton of mash. 600 eggs = 50 dozen x 45¢ per dozen = \$22.50 more income per ton of mash—
—actually \$1.12 per bag.

See how just one extra egg per hen per month wipes out a price difference of \$1.12 per bag of feed? See how much profit you can lose by being penny wise and pound foolish in buying egg mash? Get Larro Egg Mash—watch results.
