The "MC"

JOHN DEERE'S FIRST TRACK-TYPE TRACTOR

Come in and See it!

The "MC" is a brand new John Deere Tractor that fills a real need on many general farms and in certain orchards, vineyards, and hopyards where traction and stability are problems. Light soils... wet or loose ground... rough terrain... woodland... extreme hillsides—in all these conditions, on every drawbar job, you'll be amazed at the sure-footed power of this "little giant."

In its looks... in its design... in its precision construction, the "MC" is strictly modern. It pulls a 2- or 3-bottom plow; handles an 8-foot double-action disk harrow and similar loads. Has four forward speeds from 1 MPH to more than 5 MPH. Regular equipment includes electric starting equipment, adjustable air-cushion seat, power shaft, fenders, and many other extra-value features.

If your conditions call for 2-3 plow power with maximum traction and stability, the new Model "MC" is just what you need. Ask your John Deere dealer to show you this remarkable new tractor at the earliest possible date and arrange for you to put it through its paces yourself. A field demonstration will convince you of its outstanding performance.
