

United Nations 4th Anniversary Observance Set

Hillsboro schools, churches, and Camp Fire Girls will be among the organizations observing United Nations day Monday when the UN celebrates its fourth anniversary. The day was set in 1945 when the UN was born.

In 1947 the general assembly of the UN met in London and the day was proclaimed as United Nations day. The president of the United States, the president of the United Kingdom, and the president of the United Nations are among those who have proclaimed observance of the day.

Churches will hold the birthday of the UN on October 24. Schools and service organizations have been asked to observe the day. The United Nations Educational, Scientific and Cultural Organization, UNESCO, was formed as a medium for exchange of information and for the promotion of peace through respect for individual and for civilization as an assertion of freedom.

When the United Nations was established in 1945, 51 nations were cooperating. Now 58 nations are members.

Mrs. John Kovaly, representing American Association of University Women, and Mrs. Max Beecher, representing the Hillsboro Coffee Club, have asked that business houses cooperate in displaying flags and posters.

Mayor Harry M. Seabold proclaimed observance of the day with this message:

"On October 24 people all over the world will celebrate the fourth anniversary of the coming into being of the United Nations. This day has been set aside both by the United Nations and by our government as United Nations Day. I am indebted from United Nations headquarters that most of the 58 member countries of the United Nations are arranging fitting observances for this occasion, and in the United States the day is being celebrated in virtually every community.

This year, United Nations Day marks the fourth birthday of the international organization created in San Francisco. The four short but crowded years since the charter was ratified have put the new organization to severe tests. But the peoples of the world have found wisdom to look to the United Nations to preserve the peace. They see its strength in the fact that one-quarter of the earth's population would have been at war today were it not for the intervention of the United Nations and the use of its peace-making machinery.

Compared to what the world would have been like had there been no United Nations at all during the past four years, the people of this community, and of every community, are safer and better off today because of the existence of this great organization. Let us be sure that it is what really counts, and that is why we are observing United Nations Day in Hillsboro.

Local Students Among OSC Group To Win Plaque

Two Hillsboro students at Oregon State college found that their names are sometimes judged by the United Nations and UNESCO.

Two Hillsboro students at Oregon State college found that their names are sometimes judged by the United Nations and UNESCO. The students are Margaret Freudenreich and Robert Hutchings of Hillsboro.

Members of the Oregon State University judging team which received the Herford plaque for Saturday at the Pacific International Livestock Exposition, judged the stock judging contest. Miss Freudenreich was presented with the Suttell award, a book, "Sheep Trials," on the history of the development of the sheep industry in the United States.

Strict rules were enforced during the contest. Twelve classes of sheep, cattle and swine, four each of sheep, beef and swine. The Oregon team showed the results of much practice on the part of the students.

Local Folk Attend Newspaper Sessions

Charles H. Hogan, Argus advertising manager, attended the regular fall meeting of the Oregon Newspaper Publishers' association, held at the Multnomah hotel in Portland Friday and Saturday.

After the session, Hogan held Saturday afternoon in connection with the meeting was attended by Mrs. Roger Barnes, Verne McKinney, Elmer Hawkins and John Laurs of the Argus staff and Mr. and Mrs. A. L. Amacher.

Slot Machines Bring Fines to Three Men

Prosecution and operation of slot machines at the local Legion club brought \$300 in fines last week when the defendants appeared before Circuit Judge R. Frank Peters.

Charles Thompson and Fred Claus were fined \$100 each and Emory Thompson \$50. The slot machines were taken from the Legion club on October 10 by District Attorney G. Russell Morgan, Sheriff Dick Bush, and Chief of Police Melvin DeBord. No charges were brought against the American Legion and it was not involved in the case.

Rebekahs Plan Homecoming—Rebekah lodge, W. V. Chapter Homecoming at its meeting at 8 p.m. Friday at the IOOF hall.

News Men Tour Refinery On Flight to California

By Verne McKinnis, Co-Publisher

The news men in the industry were brought to the attention of the refinery on Tuesday at a tour of the Richmond, Cal., refinery of the Standard Oil company in connection with the "Oil Progress Week." Among those making the tour were Bill and Verne McKinnis, Argus co-publishers, and Arthur McKinnis, publisher of the News-Times of Forest Grove.

The flight down, which was delayed more than an hour and a half by fog at the Seattle and Portland airports, was a highly organized affair and 35 minutes. The newspapermen, accompanied by several Standard Oil company public relations representatives, were met at the Oakland airport by company officials and the mayor of Oakland.

See Latest Developments

A tour of the 180-acre Standard Oil refinery at Richmond was made following lunch on Tuesday. The tour was a moving picture showing the refinery's operations, required by law to be shown to the public. The tour was a moving picture showing the refinery's operations, required by law to be shown to the public.

The tour was a moving picture showing the refinery's operations, required by law to be shown to the public. The tour was a moving picture showing the refinery's operations, required by law to be shown to the public.

Boasts Many Statistics

Two-thirds of this crude oil comes to the refinery through pipelines reaching down into California's San Joaquin valley. One-third is pumped ashore from tankers which pump up to 100,000 barrels of oil. It uses daily 145 million gallons of salt water. It produces 14 million pounds of steam and 10 million cubic feet of gas. It produces 14 million pounds of steam and 10 million cubic feet of gas.

Operating night and day, the Richmond refinery uses heat, pressure and chemistry in turn, producing 14 million pounds of steam and 10 million cubic feet of gas.

Develop New Processes

Adjacent to the refinery are the principal laboratories and offices of California Research Corporation, a subsidiary whose field is research, development and technical service. Most of its work here is devoted to products and processes.

Some of the recent steps made possible by this research group include development of detergents for many new "super" oils and an inflammable hydraulic fluid for aircraft. A new process making possible the manufacture from petroleum of synthetic anhydride, an important intermediate in plastics and high-grade paints.

Visited also was the Long Wharf, a giant "T" extending nearly a mile from shore in San Francisco Bay. It is the refinery's link with markets served by the company's fleet of seagoing tankers and inland craft. It also is a port of entry for approximately one-third of the crude oil fed into the refinery's processing units each day, and a fueling station for many commercial cargo ships.

At high and spacious as a 22-story office building, the Thermodyne Catalytic Cracking plant is also a modern oil refining plant. When time built to produce a daily output of thousands of barrels of 100-octane aviation gasoline, it now has been adapted to the production of high-octane gasoline and the components of many other petroleum products.

Ingenuity in Evidence

The great plant and package warehouse is an emblem of the most up-to-date thinking and the latest in mechanical ingenuity for the flow-line movement of petroleum products. Assembled under one roof, covering seven and one-half acres, are manufacturing, finishing, handling and shipping facilities. One of the most unique features of this plant is a basement control box, walled with glass, where one man controls the destination of every tube oil, gasoline, thinner or solvent scheduled to be loaded on one of the box cars of the plant's 27 rail tracks. The barrels pass through an electric dispatching machine at the rate of one every three seconds. As the operator presses a button corresponding to the desired code on the barrel-head, the machine sets in motion a mechanism which remembers the destination, and shunts the barrel from the main track to box car, truck, loading dock or into the warehouse for storage.

Refinery employees organized a rod and gun club in 1920 to take over an abandoned brick yard where they could practice flycasting and marksmanship. Since then they have enlarged its facilities to provide recreation of almost every type for themselves and their families.

Industry Gigantic

Ninety per cent of the energy used in Oregon, Arizona, California, Nevada and Washington is supplied by the oil industry. In order to provide this energy, the 12,000

Grid Sport Has Many Changes, Speaker States

Football has made highly radical changes in the last seven years, according to a highly organized speaker, Harry Wright head football coach at Portland university.

Wright, who is a member of the National Football League, said that the game has changed so much that it is almost unrecognizable to those who played it in the early days.

He said that the game has become more of a team sport, with each player having a specific role to play. He also said that the game has become more physical, with more emphasis on blocking and tackling.

Wright also said that the game has become more strategic, with coaches using a variety of plays to outwit the opposition. He said that the game has become more of a science, with coaches using statistics and other data to make decisions.

He also said that the game has become more of a business, with coaches and players being paid large sums of money. He said that the game has become more of a profession, with coaches and players being trained in specific skills.

Wright also said that the game has become more of a spectacle, with large crowds of fans attending games. He said that the game has become more of a entertainment, with coaches and players trying to entertain the fans.

He also said that the game has become more of a challenge, with coaches and players trying to outwit the opposition. He said that the game has become more of a test of skill, with coaches and players trying to outwit the opposition.

Wright also said that the game has become more of a team effort, with each player having a specific role to play. He said that the game has become more of a team sport, with each player having a specific role to play.
