THE ENDLESS MATCH—A very useful article, called the Endless Match, says the S. F. Times, has made its appearance in market and is attracting considerable attention. It consists of a neat tin tube, about three inches in length and a little less than a quarter of an inch in diameter. In this is placed a match, which is run out of the open end of the tube, by means of a slot, about one eighth of an inch, when it is desired to light it. By a gentle friction it is ignited the same as any other match and will continue to burn by pushing it out slowly. By pulling the match back, or covering the open end of the case with the cap used to protect it while being carried in the pocket, it is easily extinguished. To relight it, needs but a gentle friction as before, and so on until the entire match is consumed. One of the great advantages of the new invention is, that the match cannot be blown out, and it can be lighted after being immersed in water.

A blind horse wandered into White River at Indianapolis, and getting beyond his depth, swam around in a circle, trying to find his way out. His distress attracted another horse not far away on the bank, who first went to the water's edge and tried to direct the blind horse by neighing. Failing in this he took to the water, and swam out to his relief, and after swimming around him for nearly a quarter of an hour, finally got the blind horse to understand in what direction the land lay, and the two horses came to shore side by side, amid the cheers of upwards of one hundred persons, who had become spectators.

The experiments, which have been made over the telegraph lines between Harvard College and San Francisco, show that the traveling time required by electricity is as follows, from Boston: To Buffalo and back, 0.10 seconds; to Chicago and back, 0.20 seconds; to Omaha and back, 0.33 seconds; to Salt Lake and back, 0.54 seconds; to Virginia City and back, 0.70 seconds; to San Francisco and back, 0.74 seconds.

One of our exchanges reports that half a dozen young ladies are said to make a living in Nashville (Tenn.), by donning new and fashionable dresses on fine days, and pronouncing the most frequented streets. The girls must have fine figures, and be good looking. A good "walker" is paid \$1 per day.

To make an amusing sympathetic ink, mix lemon and onion juice. Writing or pictures made with this mixture on plain white paper will, when dry, be invisible. But on warming the paper before a fire, the lines will appear in brown tints. Very pretty effects may be thus produced.

"There is no accounting for taste." We chew tobacco, the Hindoos lime, and the Patagonians guano. Our children delight in candy, the African in salt, while the Esquimaux leap for a bit of tallow-candle. To us turtles are a savory dish; the French revel on frogs, and snails; other savages on snakes.

A woman in Troy, N. Y., has produced a needlework picture of Washington, containing nearly 700,000 stitches. It was raffled off and won by Prof. H. M. Coleman, of Vassar College. Three hundred tickets were sold at one dollar each.

A New York lady recently ordered a trousseau at Stewart's for her daughter's doll, which received a complete outfit in under clothing, silk and lace. One of the articles ordered was an India shawl, miniature size, at \$30, and a lace handkerchief was valued at \$12.

Miss Sallie Banks has been appointed Deputy Collector of Internal Revenue for the District of Sumpter (S. C.) Miss Banks has been for some time teaching a colored school.

It is said that Stewart & Co., of New York, are gradually introducing saleswomen into their establishment, and intend, so soon as it is practicable, to have all their selling clerks women.

In Italy and Sicily the finest and sweetest grapes grow on the rocky rubbish of volcanoes, and on the loose soil along rocky hill-sides. This fact would seem to indicate that rich soil is not necessary to produce the sweetest grapes.

There have been twelve murders and twenty-six suicides in Chicago since last December.
