"GAY" NEWS. Farmers Can Ride and Plow.

GAY" PLOWS 865 and 875.

THE simplicity and practicability of this new Plow commends it favorably to the special notice of every farmer. It passesses a decided superiority over all other plow now in use. The wheels are four feet in diameter, and run on the unplowed land. Its entire construction is in no way complicated. The plow it managed in every manner with ease, and require only two levers to be used in making any alteration. The superiority of the "Gay" Plow will be clearly shown by the following certificate:

We, the undersigned, citizens of Linn county, Oregon, having purchased and used upon our farms the "Gay" Yow, hereby certify that the same has given us entire satisfaction. Its facility for adjuting to suft the depth of furrow without for adjuring to sup the depth of furrow without moving from the seat, is simple and easy. We like the plow for its draught, because the same is turn, let to bear directly upon the plow-beam instead of the carriage; also, because it is alrong and durable, all except the wood-work being constructed of wrought iron—no cattings are used. The wheels minning upon the solid land is an advantage over other gang plows, in strking off land and is plowing, not baving to make the necasary changes in the machinery, and the seat is always lvcl, not thr wing the driver forward or sideways as in other plows. Better work and more of it can be accomplished by the use of this Plow than by hand.

We take I leasure in recommending the "GAY"
Prow to our brother farmers, as one having no
sup-rior in Oregon.
