Poisons and their Antidotes.

BY OUR FAMILY PHYSICIAN.

Even with the greatest carefulness, accidental poisoning will often occur. Children are much inclined to try bottles and parcels, before they are able to read the labels. Nearly every poison has its anti-dote, which will prove effective if used at once; loss of life often results from a delay of but a minute or two. Dr. R. M. Vedder, of Flushing, N. Y., has prepared the following for the American Agricultural-

The Greeks who had such a keen sense of the beatiful, qualified Venus as the "laughter-loving:" Shakespeare was very fond of sprightly heroines, whose sallies provoked laughter. Moore immortalizes the feminine laugh in his exquisite sketch of an Irish girl, to whom he was pleased to give the Asiatic name of Nourmahal. Balzac (who can hardly be called a poet) was very fond of "a silvery laugh," and used to say that none but thoroughred gentlewomen had a right to weep, because theyalone weep without disfiguring them-selves. Now, hear what M. Dumas has

to say on the other side:

it is because women do not like it. And why do they dislike it. Because in a comedy men are only conquered by the ruses, the tricks, the malices, and the graces of the fair. This does not satisfy women's ambition. It smacks of the feints in a fencing school. The conqueror neither sees the blood nor hears the grouns of the conquered.
