New Your, August 15, 1868. Allow me to call your attention to my PREP-ARATION OF COMPOUND EXTRACT BU-

CHU. The component parts are, BUCHU, Long Leaf CUBEBS, JUNIPER BEERIES.

Mode of Hreparation:—Buchu, in vacuo. Juniper Berries, by distillation, to form a fine gin. Cubebs extracted by displacement with spirits obtained from Juniper Berries; very little sugar is used, and a small proportion of spirit. It is more palatable than any now in use.

Buchu as prepared by Druggists, is of a dark color. It is a plant that emits its fragrance; the action of a flame destroys this (its active principle) leaving a dark and glutinous decoction. Mine is the color of ingredients. The Buchu in my preparation predominates; the smallest quantity of the other ingredients are added to prevent fermentation; upon inspection it will be found not to be a Tincture, as made in Pharmacopæa, nor is it a Syrup—and therefore can be used in cases where fever or inflammation exists. In this, you have the knowledge of the ingredients and the mode of preparation.

Hoping that you will favor it with a trial, and that upon inspection it will meet with your appro-
