BRIDGE AT LEBANON NEEDED .- The subject of building a bridge across the Santiam at Lebanon is receiving the serious attention of her people. A bridge at that point is greatly needed, and would be not only of vast benefit to Lebanon, but to this city as well. A large scope of as rich country as there is in the State, is now practically shut off from intercourse with the "balance of mankind." owing to the difficulty and cost of crossing the river, which would be obviated by the erection of a bridge. A good substantial structure might be thrown over the river at a small cost, and we hope that the effort now being made looking to such enterprise, may meet with the success its importance demands.
