## TO PHYSICIANS.

New York, August 15, 1868 Allow me to call your attention to my PREP-ARATION OF COMPOUND EXTRACT BU-CHU. The component parts are, BUCHU, Long

CHU. The component parts are, BUCHU, Long Leaf CUBERS, JUNIPER BEERIES.

Mode of Hreparation:—Buchu, in vacuo. Juniper Berries, by distillation, to form a fine gin. Cabebs extracted by displacement with spirits obtained from Juniper Berries; very little sugar is used, and a small proportion of spirit. It is more palatable than any now in use.

Buchu as prepared by Druggists, is of a dark color. It is a plant that emits its fragrance; the action of a dame destroys this (its active principle) leaving a dark and glutinous decection. Mine is the color of ingredients. The Buchu in my preparation predominates; the smallest quantity of the other ingredients are added to prevent fermentation; upon inspection it will be found not to be a Tiacture, as made in Pharmacopuea, nor is it a Sgrap—and therefore can be used in cases where fever or inflammation exists. In this, you have the knowledge of the ingredients and the mode of preparation.

Hoping that you will favor it with a trial, and that upon inspection it will meet with your appro-

that upon inspection it will meet with your appro-bation, with a feeling of profound confidence, I am very respectfully, H. T. HELMBOLD, Chemist and Druggist of 19 Years' Experience.

Every day made matters worse. We did all that we could to be friendly, and determined to avoid an open rupture as far as possible, for there were only twelve on our side, and on their side apparently twelve hundred.

We held a council of war and determined to bring matters to a crisis at once.

The crisis soon came.

One day a big Indian came riding along by us. He began talking in a contemptuous way, and gesticulating furi-ously. At last he asked one of our men for his gun. The man refused. The Indian repeated his question, and attempted to take the gun from his hand. The man drew back. At this the Indian sprang forward, flourishing his knife and threatening. The man then calmly levelled his piece and shot the Indian through the heart.

As the wretch fell shricking from his horse the plain seemed to be a live with other Indians. From behind every clump of trees, every hillock, every rock and every piece of rising ground, they poured forth in countless numbers. We had never before seen so many assembled together as now.

And now our companion, the conjurer, came out conspicuously. He had been in the French army, he said, and under-stood all its admirable discipline. A few words of warning and a short explanation sufficed to make us form a circle of the wagons, and draw up behind them, with the baggage heaped up for breastworks. There we waited for the savages. But they did not come just then, they

sounds Horses were tramping, men calling; grouns were mingled with cries of rage. During all this time we fired at intervals whenever we heard a sound, husbanding our ammunition, and not willing to waste a shot.

At last there rose a wild tramp of horses, the sound moving away from us, and seeming to show that our enemies had retired baffled from the assault.

Yet we were afraid of some plot. Grig non made us keep our watch, and all that night we lay on our arms, expecting every moment to hear the Indian vell which announced the assault of the sav-

After a long night, which seemed interminable, morning dawned. As the light illumined the plain we looked around anxiously for our enemies, but saw none whatever. We took a hasty breakfast, and then deliberated on what we ought to do. Griguou gave it as his opinion that the Indians were yet in the neighborhood and were waiting to attack us on the march. He thought that it would be better to wait at least another day. We all yielded to his opinion, and
