A T A MEETING HELD BY THE STOCK-holders and members of the Santiam Diten Company, it was resolved by the Company that, before investing all our fortunes in so hazardous a speculation, we recommend to cach and every on the Santy to secure for their of the memoers of the Society to secure for their families a BUCKEYE SEWING MACHINE, so that in case of a lailure in the Ditch arrangement their lamines would have some means by which to gain a livelihood.

Eight Reasons why the Buckeye Sew-ing Machine is Superior to all Others:

It is the simplest shuttle machine made.
 It has less wearing parts.
 It has no small springs and compound

4. It is better adapted to a large range of work ithout change.

5. It has less pieces of machinery.

6. It is less liable to break needles than any

shuttle in any other machine.

8. That it has the best Feeding device, which 8. That it has the best Feeding device, which will never wear out, get out of order, break needles, feed unevenly, slip on starched goods, or pucker the seam, so that one part of the fabric will come out shorter than the other, which all other feeds are liable to do. It makes every stuch of an equal length. It is stronger than other feeds. We can take a strong piece of cloth and put one end in our machine and the other end in any other machine, and guarantee that our machine will take the cloth from the other, in consequence of the superior strength of the feed.

It is the only feed strong enough to feel thick sole-leather, sewing on show seles. No scaping.
