I do not wish to inform you, reader, that Dr. Wonderfal, or any other man, has discovered a remedy that cures Consumption, when the langs are nearly half consumed, in short, will cure all diseases whether of mind, body or estate, make men live forever, and leave death to play for want of work, and is designed to make our sublunary sphere a blissful Paradise, to which Heaven itself shall be but a side show. You have heard enough of that kind of humbuggery. But when I tell you that Dr. Sage's Catarrh Remedy will positively cure the worst cases of Catarrh in the Head. I only assert that which thousand can testify to. I will pay \$500 Reward for a case that I cannot cure. A pamphlet giving symptoms and other information sent free to any address. This remedy is

T A MEETING HELD BY THE STOCKholders and members of the Sunlism Ditch Company, it was resolved by the Company that, before investing all our fortunes in so haza-dous a speculation, we recommend to each and every one of the members of the Society to secure for their families a BUCKEYE SEWING MACHINE, so that in case of a failure in the Ditch arrangement their families would have some means by which to gain a livelihood.

Eight Reasons why the Buckeye Sewing Machine is Superior to all Others:

1. It is the simplest shuttle machine made.

2. It has less wearing parts

3. It has no small springs and compound

cranks.
4. It is better adapted to a large range of work without change. 5. It has less pieces of machinery.

6. It is less liable to break needles than any

other machine.
7. The Shuttle will wear longer than the shuttle in any other machine.

S. That it has the best Feeding device, which will never wear out, get out of order, break needles, feed uneveply, sip on starched goods, or pucker the seam, so that one part of the fabric will come out shorter than the other, which all other feeds are liable to do. It makes every stitch of an equal length. It is stronger than other feeds. We can take a strong piece of cloth and put oncered in our machine and the other end in any other machine, and guarantee that our machine will take the cloth from the other, in consequence of the superior strongth of the feed.

It is the only feed strong enough to feed thick solviesther, sewing on short soles. No semiler

sole-leather, sewing on shoe soles. No soaping the clath or any other aid is required. It has no complicated machinery, and therefore is not fiable to get out of order. It has a beautiful movement, making nearly two thousand The BUCKEY E SEWING MACHINE make
