Albany Megister.

LOCAL MATTERS.

ATTEND THE MEETING. - Parties who have taken stock in the Santiam Canal enterprise, and all others who wish to subscribe to the capital stock, are requested to meet at the office late-Ferry street, on Saturday, August 31, 1872, at 1 o'clock P. M. of said day, to take the necessary steps to organize a company, so that the early commencement of work on the proposed improve-ment may be inaugurated. More than built the capital stock has been taken, thus enabling the stockholders to orgmize themselves into a company for the prosecution of the work. Let everybody attend without fail, who is in the least interested in the future of

CITY FINANCES.-Following is the condition of the city fluances to date. as handed us by our gentlemanty Recorder, J. R. Herren

Cash collected on taxes	1,191	69
* collected on fines * rec'd from former Treas		
Total receipts	14,525	66
close of the year 1871		27

\$3,827	39

Available assets	09

COMPLEMENTARY. - A ticket (not bransferable), has been kindly sent us, to attend a grand skating tournament which will transpire on the evening of August 31st, at Woodward's Gardens, San Francisco. A diamond eagle medal, made of twenty-two carat gold. and containing twenty-two diamonds, with gold skate attached containing two more diamonds, the whole valued at \$250, is to be awarded to the most graceful and skillful skatist. It would do us proud to attend the tournament and take them medal, but as no "pass" ever rall and steamer lines, or "check" to defray "incidentals," accompanied the ficket, our friend Woodward will please exense our non-attendance, and trake our apology to the admiring erowd who will doubtless assemble on the occasion to shake our editorial digits and glance into our eagle eye Excuse us this time, noble duke!

MALSEY ITEMS .- H. C. Clement, Esq., writes us a note from Halsey, from which we get the following items: The warehouses have received only about 14,000 bushels of grain as yet. as farmers have not fairly commenced hauling. Halsey is rapidly increasing in size and population, and business is very good for the season of the year. Mr. C. has promied us a weekly re-Halsey during the season, and this, together with reports from other important points in the county, which we take up the remaining stock, and put our readers a fair idea of the amount of grain harvested in Lina county during the season.

NEWSPAPER EXTERPLISE. - A circuar from the office of the S. ete informs us of the prosperity and increasing patromage of that enterprising journal. Its circulation having bereased very rapidly within the last six months, the proprietors find themselves unable to print their full edition in time for the malls with present fato order direct from the New York factory, a new "Hoe rotary, four cylinder, double quarto" press which will print all four pages at once, with a capacity of striking off 10,000 complete copies per hour, which can, by stereotyping, be increased to 20,000 per hour. The press will weigh fifteen tons, and will be 32 feet 8 inches in length, 13 feet 6 inches wide, and 16 fet high. It will take six men to work it, and will cet \$30,000. An entire new dress is to be purchased for the Chronicle, when it will be one of the neatest, as it is now one of the sprightliest, papers on the Pacific

PERSONAL MENTION .- Judge Johnsm, of Oregon City, was in the city on Monday.

Andy Carothers, of A. Carothers & Co., has gone for a two weeks' feast on oysters, clams, etc., at Yaquina,

John Barrows, of Blain, Young & Ca., starts for San Francisco on Monđày.

Mr. Kline, of Kline & Co., left for San Francisco on Saturday.

Bob Head, of the Corvalli Democrat, was in our burg on Saturday, looking after the interests of his paper.

Geo. Steel, of the firm of Gill, Steel & Bancroft, Portland, called the first of the week.

Contag.-Willamette No. 1, Portburd, has accepted the invitation of our Onesters, and will be here on the this of September, when a grand time will be had by the fire-boys and their guests. Fun ahead.

JARCIOUS .- We are indebted to our stream d friend, J. Beard, Esq., for s bucketful of those superior Lawton buckberger gathered from his garden.

struction of a canal or ditch, carrying water from the Santiam river to this city, for manufacturing and other purnoses, has been canvassed __! re-eauvassed until every citizen is thoroughly conversant with all the pros and cons connected therewith. While there can be found no man in the community who is not convinced of the importance to the growth and prosperity of this city of the success of the improvement-of the successful transfer of the waters of the Santiam to this city, by means of a canal or ditch-at the same time it is also apparent that our people are lacking in the energy and enterprise necessary to the successful carrying through of the enterprise. We mean by this assertion that the moneyed men-and it will take money to build a canal twelve or fifteen miles in length, with its locks, gates, etc.-do not take hold of the matter with the necessary spirit-in short, do not come down with the "kale seed" in sufficient quantities to put the matter to a successful issue. There has been too much anothy and want of appreciation in a matter that is really of so much intrinsic worth, in fact, of such absointe necessity to the prosperity of our city. On divers and several occasions subscriptions have been circulated, meetings have been called, speeches made, and in one instance at least, an assessment levied. and a surveyor employed to run a line for the proposed ditch. Mr. Unthank. we believe, not only made a thorough survey of the proposed line or route of the canal, but drew up a profile-map, said map being now in the possession of Luther Elkins, Esq. All the efforts heretofore, from want of a proper understanding, unity of purpose, or some other cause, in the direction of the canal, have signally falled. Some weeks since Mr. Elkins determined to make one more effort to arouse our people to the importance of the enterprise. After much labor he has succeeded in obtaining something over half the amount of capital needed. subscribed, and now proposes to call the subscribers of said stock together, organize a company, securing immediately to the company so organized the right of way for a ditch, levy an assessment upon the capital subscribed, and push the work to a successful completion. We are in hopes now that when this matter once takes definite shape, our people will not be found backward in aiding it. The amount necessary to complete the improvement is not beyond the means of our citizens. and should all be subscribed right here. Citizens of Albany, wake up to the interests involved. Don't let this nort of the amount of grain stored in matter go by default, but attend the meeting called for Saturday afternoon, August 31st, organize a company, have secured the promise of, will give the enterprise through. The simple announcement that a company has been legally organized and all the stock subscribed for building the Santiam ranged and adjusted, that it would canal, will have an immediate and unprecedented effect upon real values in grain of wheat should be lost in its this city; it would stimulate the growth and material welfare of the city more than any other enterprise ever has, since the first settlement of

A RESOLUTION,

Adopted at a meeting of the Common Council of the city of Albany August 15th, and ordered printed:

Section 1. Resolved by the Common Conneil of the City of Albany, That the citizens of the said city be, and they are hereby requested, to take such measures as are necessary to remove all filth from their rear and back yards and alloys, or streets adjacent to their property, and also to prevent mwholesome smelts arising from neg-lected outhou es; and we would very respectfully recommend the use of

Sec. 2. And the City Marshal is hereby instructed to require compliance with the foregoing request.

J. R. HERREN, City Rec.

AN INCIDENT OF HARVEST .- One day last week, Judge Baber, while at the residence of Martin Luper, Esq., incidentally remarked that be was in want of more harvest hands. Mrs. Luper, who was present and heard the remark, at once proffered her services to drive the reaper, which, by the way, is one of the Wood Combined Reapers and Mowers, recently purclased by the Judge of W. S. Newbury. Esq., of this city, agent of C. B. Comstock & Co. The Judge remarked, "all right," not having the remotest idea at the time, that Mrs. Luper meant just what she said. The following morning, however, to the Judge's great surprise, bright and early, Mrs. Luper made her appearance, and after selecting the best team in the Judge's stables, and seeing them properly harnessed and "hitched" to the Walter A. Wood self-raking resper, mounted and proceeded with the business of cutting the wheat. For two days Mrs. Luper managed that team and reaper, in wheat estimated to yield forty bushels to the acre, with such skill as to obtain the unanimous expression from all who have been over the fields, that it is really the cleanest and smoothest job of harvesting exe ented during the present season in Albany Prairie. Mrs. Luper took entire charge of the Reaper during the two days, oiled it, etc., and when asked by her husband, Martin Luper, Esq., why she couldn't drive his Reaper during the harvest, remarked that she could and would, it he would purchase one of the same kind of machines-the Walter A. Wood Self-raking Reaper. In this connection we remark that Judge Baber and Mr. Luper, two of the leading and most successful farmers in Lian county, are both highly pleased with the manner in which the Wood machine does its work, and prononnee it the best machine now offered to the public. C. B. Comstock & Co, are the sole agents for the sale of this Repper in Oregon and Washington Territory.

WHERE TO STORE WHEAT, -Among

the most prominent dealers in grain in this city, Messrs. C. B. Comstock & Co. take rank. Since puchasing the large warehouse at the foot of Ellsworth street, they have kept a number of mechanics employed in strengthening extending, adding to and repairing it. have put in a new engine and boiler. a number of elevators, two cleaners that do their work to a charm, and otherwise so improved and simplified the internal arrangements for handling and storing grain, that it would seem that a more convenient warehouse could not be found anywhere-and mechanics are still at work adding to the conveniences. The warehouse contains seven grain bins, 23x30 feet. besides a large amount of room for storing grain in sacks. The processes of cleaning, weighing and elevating the grain have been so carefully artransfer from wagons to the bins. This is a sweing feature that recom-mends the warehouse to every farmer. The machinery and everything connected with the warehouse moves with the utmost harmony and ease; and the business is so carefully managed, under the care of W. S. Newbury, Esq., Mesers, Comstock & Co.'s agent, that an accident of any kind would seem entirely out of question. Another teature that may add to the customers of these gentlemen, is the fact, stated by them in their card in to-day's issue, that they enjoy superior facilities for shipping grain to foreign markets. Grain can thus go from first hands, ets of middlemen to make up their profits. These gentlemen have alfor storage, but are prepared, through arrangements elsewhere, to receive and store all the grain brought to them. Read their card elsewhere, and call and see and examine for yourselves their facilities for storing

and shipping grain. ACCIDENTALLY KILLED .- On Thursday night of last week, at the residence of Mr. Follace, about two miles this side of Lebanon, Robt, Raiston, son of J. Ralston, Esq., town proprietor of Lebanon, accidentally shot himself with a pistol, from the effects of which he died almost Instantly, Deceased, James Gore, and one other young man whose name we did not learn, were together in the house-the family being absent-when the accident occurred. The ball from the pistol passed through the fleshy part of the arm into the left side of deceased. There are so many rumors affoat in regard to the manner in which the dreadful accident was brought about, that we are left in doubt as to which is the true one, and therefore shall give none of them nutil we are satisfied we have tull and reliable data.

THANKS .- We are under obligations to Mrs. Martin Luper for presents of nice, sweet corn—"roastenears"— left at our residence on different occasions during the week,

TANGENT ITEMS.

TANGENT, August 21, 1872. The late rains have caused considerable delay in harvesting; but there was not sufficient to do much damage. It caused some of the grain to strawfall, and has increased the number of green heads or second growth, which came up after the previous rainfalls.

The Spring sowing is coming in. and is of fair average quality. The yield per acre promises to be about an average.

The best sample of spring sowing that has come to the warehouse, is of the Chili Club variety and was grown by Mr. C. Peperling, on new ground, on the farm of Mr. C. P. Kuighton, about one mile south of Tangent.

A novel sight to some of the people of this vicinity, was witnessed last week on the farm of Judge Baber, about a mile and a half northeast of town. The wife of one of the best tarmers in Linn county, appeared on the scene with a Wood Self-raking Reaper, and cut down a field of graie, while the Judge and another gentleman bound it up.

The receipts of wheat, stored in the Warehouse, during the week ending August 17th, were 2.233 centals amount shipped by J. H. Foster & Co. for the same week, seven car loads, or 1,400 centals. This makes a total strored and shipped from this place, during the season, of 7,329 centals, or 12,215 bushels.

W. J. M.

Figs.-We secured on Wednesday, a ripe fig. said fig having obtained its start in the city of Albany, Linn comty, Oregon. It is a peculiar fruit, is if the specimen before us is a fair aver age fig. we don't take to figs—that is to say, we are not fascinated by shape, taste or smell. But what we intended to say was, the aforementioned fig was, with others, taken from a tree directly in front of the residence of Mr Chas. Mealey. The tree was brought from California in 1862, and planted fail to see the New Wilson Machine, where it now flourishes and brings and remember that FIFTY DOLabundant fruit. the tree has bore fruit heretofore until the present season the fruit has never ripened—has been nipped, probably, by "untimely trosts." The body of the tree, which consists of three stems, is not large, but it has a fremen-dous head. The leaf is very large, and the tree resembles a gig until water lify more than anything else we can think of. There seems to be a new growth of fruit every month.

THE CHIZENS OF LEBANON-And vicinity are requested to meet at the Methodist church in said place, on Thursday the 5th day of September next, at I o'clock P. M., for the purpose of taking the necessary steps to secure a branch or switch of the Oregon & California Railroad to Lebanon. It is hoped that a general attendance of farmers, mechanics, mer- illustrated magazine about the middle chants, and all others interested, will be present.

MANY CHIZENS. Lebanon, Aug. 22, 1872.

KILLED.-A sport named Cherokee Smith was killed in Eugene, a day or Territory. It will be of large size, two since, by a Mr. Miller. Smith neatly printed, and will be furnished had been writing letters, so the story goes, to Miller's wife; Miller told Smith that if he did not discontinue the letter-writing business in that direction, be (Miller) would shoot him. Smith, the next day, wrote two let-ters, and Miller, to make his word good, went for Smith, found him at or near the hotel, and shot him. Smith is tolerable dead. Both men reputed gamblers.

PIANOS AND ORGANS,-Probably the finest toned planes built are those of Hallet, Davis & Co., and the organs of greatest power, richness and sweetness of tone, are those offered by Geo, Woods & Co.; and the surest and easiest way to get either or both saving to the producer the margin of these, is to order of the sole agent which must otherwise go into the pock- for Oregon, Mr. Badger, an accommodating gentleman, who thoroughly understands his biz., and will fill nil ready secured a large amount of grain orders promptly. Read ad, on fourth page.

BURGLAMES.-They have had so many thieveries, burglaries, etc., in Salem, this summer, that even the little boys have enught the infection. Three little fellows, on last Sunday, we are told by the Statesmon, were spreeing around on nine dollars which one of them, the son of Mrs. Arthur, had stolen from his mother. In addition the same journal gives an instance of where a friend of Mr. E. C. Alexunder entered the room of the latter. and while he was asleep, extracted twenty-six dollars from his pantaloons, which were under his head, without waking him, replaced the pants, the next day, when Alexander had discovered his loss, handed the sum back to him. That was very unique-ly done, and quite annising, but rather suggestive of what "might have been."

PEACHES, ETC .- For a 'flue assortment of extra large plums, three varieties, apples, and two of the largest peaches we have seen on the coast, we are indebted to the kindness of the far-famed and successful nurseryman. Mr. John Millard, it is no wooder that Mr. Millard's trees are in demand, when he can exhibit such fruit to purchasers.

RECEIVED .- Report of the Oregon

EDUCATIONAL.

Albany Collegiate Institute.

FIRST TRIMESTER OF NEXT COLLEGIATE YEAR BEGINS SEPTEMBER 24. 1672. There will be Four menicipal begaringens as follows: The Department of Science, Literature and the Arts: the Normal Department of Science, Literature and the Arts, embraces the Consideration of Esokkeeping and the Latin and Scientific course.
