SOUTH BEND, Ind., Nov. 1.

The Chicago Tribune of to-day again states, it appears, that Colfax is after the Senatorship in Indiana. Even at risk of subjecting myself to more cheap wit by opposition papers about retiring, I ask the privilege of re-stating in your columns about what I have said publicly to tens of thousands, the past month, that I am not a candidate or aspirant for any position Senatorial or editorial, State or national, and of course am not a candidate for election unless the Republican nominee for the Senatorship by the united vote of the Republican members of the Legislature. The annual report of the Secretary of War is received. It is quite brief, and recommends the establishment of military prisons in place of the present system of sending army convicts to State penitentiaries. He renews his recommendation that extras to each regiment be dispensed with as vacancies occur, and thus save \$150,000 per annum. He advises raising

the intellectual standard of admission at West Point, also the sale of a large number of useless arsenals in South Carolina and elsewhere, and the establishment of a moral arsenal of construction on the Atlantic slope and another on the Pacific, these arsenals with that already at Rock Island, in the Mississippi valley, would efficiently meet the wants of the service in time of need. He concludes by regretting that one-sixth of the army is still detained in Southern States east of the Mississippi river, and hopes an improving social condition will soon spare that force for frontier service. He says military expenditures are on a descending scale.

PATENT GATE, E.C.

Self-Opening and Self-Closing GATE. PATENTED BY JOHN DICKASON, June 4, 1867.

THE GATE IS SO CONSTRUCTED That when the vehicle approaches it the wheels on one side pass over a lever which is connected to the gate hinge by a rod, thus opening the gate before you and fastening it open. After going through, the carriage passes over a similar lever, also connected with the gate hinge, causing the gate, in its rotation, to shut behind you and fasten.

No Getting Out of Your Vehicle! No Raising of Latches Nor Pulling of Strings, Except the "ribbons" of your team. It is often called

THE "LAZY MAN'S GATE" And a "Dead Open and Shut."

This gate is simple in its construction, both of iron and wood work, and not likely to get out of order. If a neat, cheap gate is desired, it may be made light, with three cross bars of wood and one-fourth inch wire, neatly curved at the top, the lower end hid in the bottom bar, which is the style of a factory made gate. The gates are now in practical use in several of the counties around San Francisco, and plenty of testimonials can be given.

THOMAS J. SAFFORD, Having purchased the

Right for Linn Co., Oregon, Has now on hand, and will manufacture the above described gate. Wherever it has been used it has received the highest encomiums, as the large number of certificates from prominent farmers in all parts of the country, now in my hands, will testify.
