Price, §1.00.

THE GATE IS SO CONSTRUCTED That when the vehicle approaches it the wheels on one side pass over a lever which is connected to the gate hinge by a rod, thus opening the gate before you and fast-ening it open. After going through, the carriage passes over a similar lever, also connected with the gate hinge, causing the gate, in its rotation, to shut behind you and fasten.

No Getting Out of Your Vehicle!

No Raising of Latches Nor Puiling of Strings,

xcept the "ribbons" of your team. It is often called

THE "LAZY MAN'S GATE."

And a

"Dead Open and Shut."

This gate is simple in its construction, both of iron and woorl work, and not likely to get out of order. If a near, cheap gate is desired, it may be made light, with three cross hars of wood and one-fourth luch wire, nearly curved at the top, the lower end hid in the bottom bar, which is the style of a factor; made gate. The gates are now in practical use in several of the counties around han Francisco, and plenty of testimonianis can be given.

THOMAS J. SAFFORD,

Having purchased the
