ONLY A BABY DEAD.

LINES SUGGESTED ON THE DEATH OF THE INFANT SON OF REV. S. G. IRVINE AND MRS. M. IRVINE.

Only a baby dead, only a little flower. Only a promise-bud is plucked, to deck the heavenly bower;

Many fair flowers, beautiful and fragrant, remain. Why miss one little daisy, from off earth's vast plain?

'Twas a little coffin and a tiny form was there: A baby form so small, and frail, and yet how fair!

Ab! 'twas a precious gem to the mother's yearning heart. A priceless treasure 'e'en of her very life a part.

Only a baby dead, but a bright little star is gone. To that brighter land forever to shine. Farewell, little one, we shall behold thy face no more

Until we meet thee on that far-off happy shore.

Surveyors have gone to Kittitas valley, Yakima county, to lay off a town. It is thought a lively town will spring up there.

A fortune-teller at Walla Walla predicts that that town will be in ashes within five months. If that is so, what is the sense of their wanting to buy another fire engine?

A debate at Dry Creek, Union county, recently, discussed the question.

"Resolved that the signs of the times indicate the downfall of our Republic." The arguing was powerful, but the judges decided the Republic wasn't to "downfall." Our Democratic readers will now rest easy.

A recent number of a British Columbia paper contains this statement: "There is a large mountain—300 feet high and 300 yards in diameter at the base—at the southern end of the prairie, about twenty-five miles from Olympia, and scattered over the prairie for a distance of fifteen miles are many smaller mounds, not more than four feet high and twenty or thirty in diameter. Many conjectures have been made in the last twenty years as to what could have caused so singular a formation, but no one was ever curious enough until within the last few days to make any examination of the interior of these mounds. A few days ago one of the engineers of the North Pacific Railroad opened one of them and found the remains of pottery; and a more thorough examination of others revealed other curious relics, evidently the work of human hands; in fact, in every mound that has yet been opened, there is some relic of a long-forgotten race discovered."

DR. VANCLEVE'S

Galvanic Abdominal Supporter

AND

UTERINE REGULATOR.

THE MERITS OF THIS INSTRUMENT

consist principally in the support it gives to the abdomen and spine. The belt is broad, supported by suspenders passing over the shoulders, and kept in shape by self-generating Galvanic Plates, which give a pleasant current.

The Regulator is also Galvanic; its Cup and Nozzles are made of Silver; its Stem, of Copper and Zinc, is hollow, that injections may be thrown through it, or into the neck of the Uterus. It can be so regulated by its thumb-screw as to meet any mal-position of the Uterus, and is unequalled in meeting any form of female disease.
