ALBANY AND SANTIAM CANAL.

The Albany and Santiam Canal Company would respectfully call the attention of the public, and especially the Capitalist, and those desiring to engage in manufacturing, to their gigantic water power and water privilege. Sixteen thousand cubic feet constantly flowing every minute, equal to 800 horse power, with from 8 to 30 feet fall, sufficient for the most extensive machinery, with ground on which to erect the necessary buildings, etc. The Company deem it but proper that the public should know more fully the locality of this great water power, its facilities and surroundings, in order that those unacquainted may form some estimate of its value.

The city of Albany is the county-seat of Linn county, located on the southeast bank of the Willamette river, about 100 miles south of Portland, by river, and 80 miles by railroad; south of Salem 45 miles by river and 30 miles by railroad, and north of Eugene City 45 miles.

Albany is located in a prairie of the same name, which is the great agricultural center of the Willamette Valley, and it is believed that upward of 500,000 bushels of surplus wheat will be received at that point, the present season. The most of it will find its way to foreign markets, either by boats or railroad to Portland, and from thence upon the ocean. The Willamette river is navigated by beautiful steamers, carrying from 80 to 300 tons, running as far as Albany some ten months in the year. Also, the O. & C. R. R., with its beautiful locomotives, is passing through the city daily. The city of Albany is located upon a high, rolling prairie, with the Calapooia, a beautiful creek, flowing into the Willamette river on the west, the water of which is used in driving two large flouring mills, situated on the bank of the Willamette river. The city is about one mile in length, running east and west, and from one-half to three-fourths of a mile in width, and is laid off with streets of good width.

The Canal, which is the subject and object of this communication, receives its waters from the South Santiam river, which heads in the great Cascade mountains, some 75 miles east of Albany; thence running westerly through a valley of the same name, to Lebanon, a village located near the west bank of said river, 13 miles east of Albany. The Canal receives the waters from the Santiam river at that point, thence running west to its terminus at Albany. The main Santiam flows northward, and empties its mountain waters into the Willamette river 10 miles northeast of Albany. The Canal is brought from Lebanon through a beautiful prairie for a distance of 12 miles, and empties into the Willamette river, forming on its way and in the city some of the finest water powers for manufacturing purposes found on the Pacific coast. There are but few, if any, points in the State which surpasses Albany now, for manufacturing facilities. Cheap water power and easy of access, and convenient transportation, either by water or railroad, and the location beautiful and healthy.

The Canal Company offers liberal inducements to persons desiring to engage in the business of manufacturing, and will furnish water power upon the most reasonable terms. Manufacturing of all kinds is needed in Oregon, and could be made profitable. The Canal Company will agree to furnish, within sixty days, any water power needed, from a button factory to that of a locomotive.

Immigrants and others are earnestly invited and requested to visit Albany and examine for themselves. Real property can yet be procured on very reasonable terms, both in and out of the city. Our people compare favorably with the rest of mankind, morally, socially, politically and financially.

CONFESSING HIS FAULT.—A country actor, performing the part of Richmond, in the tragedy of Richard III., had the misfortune to find his memory completely fail, when he had reached the words, "Thus far into the bowels of the land have we marched on without impediment." After having repeated these words several times, the audience testified their disapproval by a general hiss, when, coming forward, he thus addressed them: "Ladies and gentlemen, 'thus far into the bowels of the land have we marched on without impediment,' and curse me if I can get any further!"

BABY HERBIE.

Little baby Herbie,
Just turned three,
Standing on my shoulders
Watched the starry sea.

Bubbling o'er with laughter,
Dimples in his face,
Seemed to court the kisses
Lavished on each place.

He reached his tiny fingers
Upward toward the sky,
"Mamma, moon's broken,
A piece is in 'e sty."

On an evening later,
Perched on grand-pa's knee
I hear our baby, calling
In his merry glee,

"Mamma, moon is mended,"
And he clapped his hands
As she saw the moonlight streaming,
O'er the velvet strands.

Sec. 4. It is further provided that should any Subordinate Grange with which complaint is filed, as provided in Section 3 of this Article, refuse to entertain such, or neglect to bring its accused members to a speedy trial thereon, it shall thereby forfeit its membership in this body, with all benefits accruing therefrom; it shall be the duty of the Master of this Grange to recommend to the Master of the National Grange a revocation of the charter of said offending Grange.

Provided, however, That an appeal may be taken by either party to the State Grange, if in session, or if it shall be in session within sixty days; otherwise, the appeal may be taken to the Executive Committee.

ARTICLE 25.—Amendments.—These By-Laws may be amended or revised at any regular meeting of the Grange, by a vote of two-thirds of its members.

A short time since, near Hamilton, Minn., while Mr. Fuder was at work in the harvest fields, his wife left two children in the house and carried her husband some water. Returning in about fifteen minutes she found her little boy, seventeen months old, sitting outside the door burned to death. The little fellow had opened the stove, and his clothes having caught fire, had gone out doors.

It has been found that red cedar chips and cloves sprinkled on a show-elf of coals will clear a room of flies.
