LATE NEWS.
The Georgia election for members of the Legislature last week, passed off quietly. There was little opposition, except in a few counties, to the Democratic candidates, and it is expected that not to exceed fourteen Republicans will be returned in both Houses, thus giving the Democrats a majority of two hundred and five on joint ballot. The Legislature of Mississippi last winter passed a bill providing a new charter for New Orleans, in which the appointment of all city officers, from Mayor down, was placed in the hands of the Governor. Under a decision of the State Supreme Court, the Governor can hold a bill from one session of the Legislature to the next without approving it. It is now feared that Kellogg will approve this bill, after keeping it in his possession for over eight months, and proceed to appoint the said city officers. The charter election takes place on the 21st of next month, the Conservatives having already nominated candidates. An address has been issued by the Conservatives, protesting against Kellogg's using this power placed in his hands, though expressing the hope that he has no such intentions. The address declares that any such act would be attended with the most serious consequences, greatly endangering the public peace, etc. It is further asserted that intimidation, organized and thorough, prevails in a number of parishes, in consequence of which the great body of colored voters will not register at all. It is asserted that the postal telegraph scheme will not be recommended, either in President Grant's message or Jewell's report. The rebellion in Buenos Ayres still continues. The Governor asks Congress to provide \$2,000,000 with which to meet the expenses of the war. It is said that Lake Weewanapee, Connecticut Farms, Union county, New Jersey, has been purchased in the interest of the Prussian Government, and will be used in raising leeches, trout and salmon, to be taken to Prussia to stock her streams. The Lake covers an area of 200 acres, and is fed by never-failing springs. Goldsmith Maid trotted a mile in 2:17 1/2, at Dexter Park, near Frisco, on the 7th instant.

Our Legislators have had the matter of keeping our insane before them, and the question has been warmly discussed. No one for a moment disputes that it is the duty of the State to look closely after these unfortunate—that is a question that none dispute. The question is an economical one only. If our insane can be as comfortably lodged, fed and clothed, and proper medical attention and care paid them, as heretofore, for one dollar and a half to two dollars and a half less per week, it is demanded of our Legislators that the old contract should not be renewed. It is asserted that Dr. Carpenter offers to contract to keep the insane of the State, and care for them in all things as well as they have heretofore been cared for, at a much less price than the State has been paying. It is said that should his proposition be accepted, the State would save many thousands of dollars annually. If the statement be true, and sufficient guaranty can be given by Dr. Carpenter, that he is able and willing to carry out such a contract, what objection can there be to awarding the contract to him, and saving to the tax-payers a large sum of money during the next two years?

Jackson county is continually receiving additions to her population. Hardly a day passes but what one or more wagons of immigrants pass through Jacksonville, bound for some portion of the county. Josephine receives a considerable portion of them.
Coos Bay is a good place for steamboats. The steamer Messenger made, during the last month, 2 1/2 per cent, on her cost—\$12,000—over, and above expenses, and the latter, owing to the breaking of her cylinder heads, were quite expensive and much in excess of the average.

A boat containing several men and one child capsized just below the wharf at North Bend, Coos county, week before last, and had not timely assistance arrived from the wharf, several lives might have been lost. The men came from the Coal Banks, had been gunning, and their guns were lost.
While out quail hunting the other day with some older friends, Master Henry Pape, of Jacksonville, was accidentally shot by one of them, who did not know that he was firing at a flock of quails in a thicket. The charge was fine shot, 19 of which struck Henry in the left arm and hand, and in the breast. His wounds are not serious.

There was to be a wedding near Seaside last week. The expectant gentleman secured a team and hastened to the residence of his special sweet-heart, but was met at the gate by the wife and the man's servant. The old girl displayed a shot gun and told his would-be son-in-law that if he came inside he would shoot him. It is unnecessary to say that the young man took the hint and returned home, concluding that there was many a slip 'twixt the cup and lip.
Last week while driving along the road, Mr. Renben Booton, who resides near Bridgeport, in Polk county, met with a serious accident. It seems that his team became frightened at some object in the road and ran away. The wagon was overturned and Mr. Booton was thrown several feet from the wagon. His collar bone was broken, and he received several other bruises on his body.
Saturday before last Gus, Mitchell, while working in a logging camp at the Umpqua, just opposite Gardiner, met with an accident by which his leg was broken just above the knee. He, with others, were rolling a log down the side of a hill, he being before the log. By some means the rope by which the log was held from rolling too rapidly became loose, and allowed the log to come down and catch Mitchell upon another log. Two Jack screws had to be used before the man could be released by his friends.
Mr. Calhoun, of the Swinomish, gives the *Argus* a very encouraging account of the state of the crops in his locality. From 80 to 100 bushels of grain to the acre are realized by the farmers, and it is estimated that 1,000 tons of this article will be exported from the sparse settlement in which he resides, and much more from the Skagit and Stillaguamish. This speaks well for a country so recently brought under cultivation. The Gaches Bros., who are understood to have cultivated the land, have taken their burthen, for the purpose of taking cargoes to San Francisco.

The entire cut of the mill at Tacoma for the first nine months of 1874 was 10,800,000 feet, during a month of which the mill was run on two-thirds or four hours' time, and during three or four weeks was broken down. The highest annual cut hitherto has been between eleven and twelve million feet. With ordinary prosperity the mill will have turned out between fourteen and fifteen million feet—an increase of one-fourth.

In many cases settlers whose titles are in conflict with that of the N. P. Railroad cannot prove up till the N. P. BUILDING PAPER!
Ornamental, Aluminous and Plastering Paper Board.
IN DIFFERENT, BEAUTIFUL DESIGNS, taking the place of Lumber and Plaster in ceiling.
For cleanliness, durability, comfort and health, we recommend it.
It costs less than one-fourth the cost of Wall Paper, and is superior in every respect. It is a perfect non-conductor, keeping heat out in summer and retaining it in winter, saving in fuel, in one year, the cost of paper. It is not so easily injured by knocks as plaster, and is not so liable to cracks, winds, and is vermin proof.
Trade's Shaming.
This is a hard, compact, Straw Board, saturated with water, and other substances to render it WATER, RAT and VERMIN proof. It is superior in every respect to ordinary plaster, and is a perfect non-conductor of heat. It is impervious to dampness, and does not absorb water, and is cheaper and better than brick filling or board lining.
Roofing Felt.
Made from woolen yarn and thoroughly saturated with tar—is believed to all kinds of roofs, and is superior to all other roofing materials. It is not so easily injured by knocks as plaster, and is not so liable to cracks, winds, and is vermin proof.
Carpet Linings.
Will save one-half the wear of a Carpet—warranted proof—can be used for floors, and is very cheap.

The Alpuhe Chronicle accuses the former managers of the Monitor and Northwest mining company of manufacturing bogus silver brick to gladden the hearts of the confident stockholders and entrap the many into subscribing to the stock of the company. The brick was sent to the home office, at Milwaukee, but after remaining on exhibition for a few months an assayer discovered it to be a fraud, the article being merely a silver plating over some valueless substance.
Barney Kennedy, living at the mouth of Birch creek, Umatilla county, about two months ago, was driving a calf, and in some unexplained way, was thrown by the calf against a fence, and thereby had his left leg broken just above the ankle. There being no surgeon at hand, he set the broken limb himself, bandaged it, went to bed and remained there about six weeks. At the end of this time he took to crutches, and his fractured limb is now doing well.

Mr. J. A. Pruett returned from Willow creek, above mentioned, and informs the Tribune that Mr. M. Quaid, of that place, met with an accident a few days ago which proved fatal. The Tribune says: "Dallas City is improving somewhat. Old buildings are being torn down, and occasionally anew ones are in process of construction. This place has seen its worst day. It has experienced the reverse which almost all towns and cities sooner or later have to undergo, and henceforth it will grow slowly if it may be, but surely and steadily."

PARKER & MORRIS'
New Elevator!
IS NOW READY FOR THE RECEIVING of wheat and oats. We call the attention of farmers to the fact that we have erected the finest warehouse in the State, at a large expense, and in a position to handle satisfactorily an immense quantity of grain. Our house has a capacity for

200,000 bushels of Wheat
at one time, and is located on the margin of the Willamette River, and provided with a side track from the O. & C. R. R., so that shipments may be made daily by rail, and as often by water as loading facilities offer. We have two large suction fans, in addition to other fans, attached to the house, run by water power, and are thus prepared to
CLEAN
all the wheat received. Can take in and clean 10,000 bushels per day. Cleaned wheat is worth much more in all foreign markets than foul wheat, and is more readily shipped without cleaning. Our charges will be the highest possible prices. Having prepared ourselves to do a large business, we have for our share of the public patronage.

SAN FRANCISCO, CAL.
W. H. AIKEN, ATTORNEY-AT-LAW
and Commander of the Grand Army of the Republic in California, will give prompt attention to the collection of Additional Travel Pay, now due California and Nevada Volunteers discharged more than three hundred miles from home, and all other claims for late pay, and for unpaid bounty under Act of July 29, 1870, and January 29, 1874, so all such claims must be made before that time. Original Bounties of \$100 has been allowed all volunteers who enlisted before July 22, 1861, for three years, if not paid the same when discharged, and Warrents can be obtained for services rendered before 1855, but not for services in the late war. Pensions for late war and war of big obtained and increased when allowed for less than disability warrants, but no pensions are allowed to Mexican and Florida war soldiers. State of Texas has granted Pensions to surviving veterans of the Texas Revolution, New Orleans and Mobile Bay. Money is now due and being paid. W. H.
