the period named, by the number of 113 254 Machines, or nearly double those of any other Company.

It may be further stated that the sales of 1873, as compared with those of 1872, show a relatively larger herease, beyond the sales of other makers, than of any other year.

For instance in 1872 we sold 45,000 more Machines than any other Company, whereas, in 1873, the sales were
113,254 Machines in Excess of our Highest Competitor.

These figures are all the more remarkable, for the teason that the sales of the principal Companies in 1873 are less than their sales in 1872; whereas, as has been shown, our sales inve largely

Mr. W. Blackmore, of England, who has been down the Kausas I'acific, on a grand hunt is back again. He estimates the annual slaughter of buffalo on the Plains, at from 1,000,000 to 1,500,000. While we are inclined to think this estimate exaggerated, there is no doubt that for two or three years past, the destruction of buffalo has been immense. Mr. Blackmore is of the opinion that there should be strict laws for the preservation of this noble game.
