The total wheat yield of the United States last year was about 300,000,000 bushels, one-sixth of which, probably, was exported. On the 4th inst., the coroner's jury in the Holyoke disaster rendered their verdict. They find no blame attached to any person in connection with it, but can't too strongly condemn the almost criminal carelessness in the construction of the gulleries and main egress therefrom. They declare that parties who build such death traps should receive the unmeasured censure of the community, and find the cause of fire was from the use of trimmings of laces, paper, etc., and to the fact that the building was sheathed with pine instead of being plas-Rered.

After they had rowed out into the lake half a mile from the beach, their attention was attracted to the shore by some children, who were shouting for them to come back and take them in also. The boat by this time was leaking badly, and in a tempting to turn it around, commenced sinking. Whatever the cause that induced him, the method showed deliberate and determined will in the way he misled his parents and friends. The voil that chapity throws over the misguided act should be equaled only by the sympathy for the asgrieved parents that have had another most bittercap of sorrow in the loss of their youngest child, to drain even to its buterest dregs."

Bad language easily runs into bad deeds

Bad language easily runs into bad Bad language easily runs into bad deeds select any society you please; suffer yourself to converse in its duiect, to use its sang, to speak in the character of one who relishes it, and I need not tell how soon your moral sense will lower down to its level. Becoming intimate with it, you lose your horror of it. To be too much with bad men and bad places is not only unwholesome to a man's morality, but unknowable to his faith and trust in God. It is not every man who could live as Lot did in Sedom, and then be lit to go out of it under God's convoy.
