Myer, of Ashland, Jackson county, Oregon, then in the Eastern States, had been successful in securing another Percheron stallion, lately imported from France, supposed to be the finest horse in the United States. Since then Mr. Myer his returned to his home in Ashland, bringing this horse, which he calls the "Pride of Perche," and other purchases of blooded stock which he made while in the East. A note received from Mr. Myer informs us that he intends making the season with White Prince and Pride of Perche in this city and Salem, the coming season, which will afford our stockmen a chance to secure fine stock, an opportunity which they will no doubt avail themselves of freely. CLOTHING THE NECK .- The clothing about the neck should be very moderate in quantity and worn so loose as to prevent the alightest compression. The great errors committed in clothing this part of the body, consists in wearing such an amount as to overheat and weaken the throat, and render it easily susceptible to cold, or in wearing it so tight as to retard the circu'ation of the blood to and from the head. Great care should be exercised upon this point, as the arteries and voins leading from the heart to the brain are situated so near the surface in the neck, that a slight compression there serves to check the flow of the blood. Many cases of congestion of the brain and head solle are partially or wholly caused by too tight collars and cravats.

The Importation of Fine Stock.

Mr. W. C. Myer, of Ashland, called at our office the past week From him we learn that he arrived at home on the 1st inst, all safe with his stock, which consists of two imported Percheron stallions-"Fleury." a dark iron gray, 3 years old, and "Pride of Perche," a 4 year old dapple grey; also one full blood mare called "White Rose" and one filly 15-16ths one year old last September. Mr. Myer inform ns that the above animals are the very best he could select while in the East. stallions were selected in France by Mr. C was on a visit to France 25 years ago and at that time was so favorably impressed with this stock of horses that he selected a 3 year old and brought him to Ohio. This colt was called "Lanis Napoleon," and there was a great deal of sport made of him by the horsemen of the country. This horse afterwards went to Illinois and was the sire of over 400 successful stallious and demonstrated to the stock men of the West the value of this stock. Mr. F. has made several visits to France since, and familiar with breeding and handling of this stock in Ohio, "Fleury" and "Pride of Perche" are probably as promising young horses as any he has ever selected. Mr. Myer now has at his ranch 3 imported stallions and 7 mares that are full b'ood of high grade, one three fourths mare being the lowest grade three fourths mare being the lowest grade he has. The tollowing is an extract from the Live Stock Journal, which speaks for

Mr. E. A. Buck, who has recently become one of the proprietors and editor-in-chief of the Spirit of the Times, has spent most of his time for a year past in Europe. He has always been an admirer of trotting and of the sports of the turf. While in Europe he critically examined the various breeds of horses in the several countries visited by him, and he was so favorably impressed with the draft horses of France that h purchased twelve Percheron stallions which reached New York in fine condition about four weeks ago. Mr. Buck is enthusiastic in his praises of this breed and says that "the finest general purpose, and the best and most stylish carriage horses he has ever seen are the produce of the second cross from the Norman or Percheron stock in France, and he thinks they cannot fail to produce the same results in this country." We are especially gratified at this expression of opinion from one so well qualified to be a critical as well as an im-

qualified to be a critical as well as an impartial judge upon such matters, for it accords with our own often expressed convictions upon this subject, although our views have been frequently combatted in these columns by gentlemen whose opinions are entitled to great weight.

As a question of breeding, the effect of the cross upon our American horses is an interesting one, and it is in a fair way to be thoroughly tested. So far it has certainly given very general satisfaction, for nobe thoroughly tested. So far it has certainly given very general satisfaction, for nowhere are they more popular than where they have been most extensively tried.

In proof of this expectation, there is "Lulu," designated by sporting men as the "Queen of the Turk," having made the three best mile heats on record. Her grandstre was an imported French horse. There was a one-half brother of "Lulu" by the same horse, who was of great promise a few years ago, but met with some accident and did not come before the public.

Herewith is a letter from Mr. P. Watkins, of Wasco county, in which he gives the reception of 4 head of one-half blood coits he bought in this and Douglas county last Fall, and making inquiry about some others he then saw: others he then saw:

FIFTEEN MILE CREEK, WASOO CO., W. C. MYER—Dear Str: Knowing, or at least believing, that you would be glad to know how I succeeded with my horses I shall endeavor, as an opportunity offers, to write you a few lines.

I suppose you learned that I bought Mr. Raymond's "Beecher." He is a fine fellow—an iron-grey, stands sixteen hands, or upwards, high, and draws fitteen hundred pounds. I had no trouble bringing them up, except that "Scott" became a little sore footed owing to his not being used to

How shall I tell what people think of them? Along the road it was, "Oh, what nice horses!" "Hailo! Going to the Fair?" "Where's Myers!" On being told that they belonged to me, they would say. "Why, that's Myer's old mare, ain't it?" In Portland it was said that they were the finest horses that had ever walked the streets. Up here everybody says that they are the best horses they ever saw—I mean everybody who is not some way concerned in other stallions. I left them in Dalles one day, as I came up, that people might see them, and I think they were visited by two or three hundred people. In short
