EPIZOOTICS DISTANCED.
THE BAY TREAT STILL LIVES.

AND IS FLOURISHING LIKE A GREEN bay tree. Thousands of patients, and wishing to meet the continuance of the same, the BAY TREAT will continue to be ready, and easily found, to do any business within the city limits. For a reasonable consultation. **Dr. D. W. Arnold** is a specialty.

Pills! Pills!

WHY SAY THIS DAMAGING AND troublesome complaint cannot be cured, when so many instances of success might be placed before you every day?—of unimpaired health, and of renewed vigor and strength. Your physician informs you that the longer you allow the complaint to exist, you lessen your chance for relief. Experience has taught this in all cases.

A. Carothers & Co's Pills and Ointment are all they are recommended to be. With rare chronic, dried and bleeding piles in a very short time and are cured. This preparation is sent by mail or express to any point within the United States at \$1.00 per package.

The Eugene Irons are making arrangements for a grand ball at Lane's Hall on Christmas eve.

JOHN SCHMEER,

The Evening Prayer.
FROM THE GERMAN.

Tired, and going to repose,
Both my little eyes I close;
Father, let those eyes of thine
Be above this bed of mine.

Let my friends, Lord, far and near,
Rest within thy hands so dear;
Little ones, as well as large,
Take into thy holy charge.

Send to sick hearts peaceful sleep,
Kindly close the eyes that weep;
Let the moon high in the sky,
See the world in stillness lie.

If I have done wrong to-day,
Dear God, forgive the sin, I pray;
By thy grace and Jesus' blood,
Every trouble is made good.

OUR NEW YORK LETTER.

THE WEATHER—THE CHINESE IN NEW YORK—POLITICS IN THE METROPOLIS—DEPOLITIZATION OF THE CITY—CHILDREN'S SUMMER HOSPITAL—VANDERBILT AND HIS SCHEMES—BUSINESS.

NEW YORK, August 5, 1876.
THE WEATHER,

Which is the most important matter about New York, just now, has moderated slightly, and it is once more possible to sleep. Nevertheless it is yet too hot for either comfort or health. The heated term has been the most terrible ever known, and has swayed the mortality list to a degree that is absolutely frightful. Children have perished by the thousand, and almost an equally large number of adults have succumbed to the more than torrid heat.

One woman in Baxter street has assisted in preparing 134 children for burial. And right here let me say that there has been scarcely an instance of death from among the ranks of the temperate. The men who have avoided the use of alcoholic drinks, when sun-struck almost invariably recovered, and when recovered were as good as new. But when a whisky or beer drinker went down it was generally down for good, and it is a matter of fact that the drinking classes were a hundred fold more liable to be struck than the temperate. The temperance people may make what use of this they please, but all the city physicians will vouch for its truth.

CHINAMEN

Are invading New York in large numbers. There are now 3,000 here, and with them their opium dens and joss-houses. They are just as filthy, just as industrious and just as harmless here as in San Francisco, and follow the same occupations. They wash, make cigars, and keep street stands, pay their debts, save some money, and gamble and smoke the best of their earnings away. They inhabit Baxter street, here, as everywhere else, selecting as their headquarters the most filthy and squallid section of the city. They have only one joss-house as yet, though another one of larger dimensions and more aristocratic in style, is in contemplation. The number is increasing very rapidly, and as the great colony in San Francisco is sending off colonies Eastward all the time, it is very probable that in a few years the territory in and about Baxter street will be very much like Dupont street in San Francisco, and that in New York the religion of Confucius and the Chinese theatre and Chinese amusements and customs will have established themselves firmly in New York. Well, then come. They are a harmless, industrious and honest people, who will work and never want office. There is some comfort in that.

POLITICAL.

The Democracy are worried because Tilden and Hendricks can't agree upon their letter of acceptance, and give them a show to open the campaign. They see that while they are delaying for this opening the dissatisfied Republicans are very rapidly returning to their old resting place, that as Hayes and his character are becoming better understood, the intelligent Democracy are growing very cold toward the mulatto ticket made at St. Louis, and that, in short, unless Tilden comes to the front very soon the battle is lost for them before it is fought. The truth is, halt the deceits of Democracy of New York don't want Tilden elected in any event. They know him to be tricky and unreliable, and they feel confident that in the case of his election they are sold out. He professes to be a hard-money, resumption man, and why he don't come out and say so, instead of paltering with soft-money Hendricks, and fixing up declarations that mean nothing, puzzles them, and they feel that they are sold in him. Everybody knows where Hayes stands on all these questions, and no one will vote in the dark voting for him. Tilden is one of those exceedingly acute, small men who overreach themselves. He has no honesty himself, and does not believe that any one else has. He acts upon the theory that all men are as dishonest as himself, except the simpletons, and he very largely overestimates the dimensions of the latter class. He is foolish enough to suppose that the rank and file of the Democracy will accept any quibble for the sake of success, and he is paltering with them in that way. Hayes will carry the State of New York as sure as fate. Think, my readers, of a man who is nominated on a platform expressing the views of a great party, on a great question, who has to have two conferences with his associate, and four sessions of a committee to decide as to what he does believe, and as to what he intends to do in case of his election! This very delay is a trick which will defeat him, for it is evidence of dishonesty and

insincerity. The Republicans are very active and are pushing things delightfully.

VANDERBILT.

Old as he is, and sick as he is, is rapidly recovering, and will get out to business again. The old man is determined not to die till he has his four-track road completed through to Chicago, and possibly farther west, and has demonstrated the superiority of rail over all other means of transportation. Even during his illness he has pushed his warehouses and other improvements in the terminal facilities of his roads, with a view to saving the grain trade to the city, which is being diverted to Baltimore, Philadelphia and Boston. He has during his illness received builders, contractors, mechanics and railroad officials, every day, and when he was too weak to speak he made them understand what he wanted by writing or signs. He will do business as long as he has breath, and will be felt as long as there is life in him. His vitality is wonderful, and it would not be singular if he should be an active man for twenty years yet. He has been a temperate man. He has worked very hard all his life, but very systematically. When he works he works, and when he rests he rests. He will work all the season till about the first of July, when he goes to Saratoga, and stays till October. He rests each one and every day while at the Springs, and answers it by an amusements, and then amuses himself till precisely half past nine, when he retires and sleeps. His indulges in situations very sparingly, and is very careful of his diet. He is a fearful card-player, always playing for money, and the stakes must be high enough to make it worth while to play. Curious stories are told of his card-playing, some of which are doubtless true. He is as merciless as poker or point cutchra as he is in business, and was by the poor or careless player who falls into his hands. It is his business with him, and he pursues the game just as eagerly as he does his real business. As the chess in England was accounted a miniature war, so gentlemanly gambling with Vanderbilt is the next thing to business, and he follows it with as much zest. Now that Drew is gone, Vanderbilt and Jay Gould are the only railroad magnates left, and it is not probable they will ever lock horns, again. The old veteran has too much to do to perfect the railroads he now controls, and Jay Gould's interests and his do not conflict.

THE CHILDREN'S SUMMER HOSPITAL.

Among the charities which benevolent ingenuity is continually devising, the Summer Hospital for Children deserves free-headed support. The excursion of St. John's Guild floating hospital boat, which takes hundreds of sick children and their mothers yearly up the river for cure, has made a difference at once in the death-rate among children. But ten hours a week of wholesome life out of the stifling heat of the poor cell home is enough to keep life in them, but hardly enough to make sound children of them. The plan was devised of a temporary hospital or rather house, in one of the healthiest places on the river, where sick children could be sent for a fortnight at a time, in the dangerous part of the season. The charity is an extraordinary one. The buildings are of the plainest, airiest description, the food in the country is fresh and cheap, and the cost of the whole affair is decidedly less than that of the permanent excursion boat. The poorest woman in the city can have her sick child sent there and get the best care taken of it for weeks, without a dollar of expense to herself. In this fearful season, while the children of well-to-do people are dying like sheep, it is a great mercy that such saving help is extended to those who else had to choke and to see their covetously-loved children sickened and die without the least alleviation of their sufferings.

DESOLATION.

The city is almost abandoned. The rich fled from the terrible heat to their villas at Newport, and to the cool shades of Saratoga; those in moderate circumstances are at the thousand and one sea-side places, and up in the mountains, the artists and Bohemians are up North where they can keep cool, and live very cheaply, and only the poor and the unfortunate business men who cannot get away, are in the city. The theatres are closed, as are all places of amusement, the streets are empty, and the hotels are like Salamis in their stillness. The only trade there is comes from the Centennial folks who are passing backward and forward through the city, and they leave very little money here. Those who want it all to see the big show with, and when they return they want to get home as quickly as possible. New York lies inert, lashed, still and discouraged. Let us hope there will be a revival with the cool breezes of September.

BUSINESS.

Is still wretchedly dull, and failures were more frequent this week than last, and of rather larger dimensions. There are a great many firms that have yet to go under, and the sooner they go the better. The volume of trade is reduced, and so many houses are not necessary to do it. The strong ones will survive and be stronger for the cleaning they have gone through, but the weak ones will inevitably go under, and they might as well do it today as to hold over a few weeks. The man who was worth \$1,000,000, four years ago is today worth \$125,000, and he might as well make up his mind to it, and take it cheerfully. The bottom is out, and it is out fairly. We are getting over the war now.

FISHY.—Last week's Corvallis Gazette says that its editor, W. B. Carter, Esq., was absent at Yaquina Bay, laying in a few whales, for fall and winter use, of course. Fish is great "brain food," and Brother Carter was out of—fish!

"A Monkey Wrench is at this office awaiting an owner."—Independent Telegram.

We thought the editor's name was M. L. Pipes!

DIDN'T PAN.—The "book" informs us that the dance Friday night was a most enjoyable affair, but expenses were not realized. He says in the future a "purchase must be rigged to secure enough chickamin to pay expenses."

Sulphur and molasses, the old fashioned internal remedy for the itch, is obsolete. That and other obnoxious skin diseases are cured in half the time, without disordering the stomach, by Glenn's Sulphur Soap, the great external anti-scurbutic.

NO BETTER TIME THAN THE PRESENT.

There is no better time than the present for going to work on the Yaquina Bay Railroad project. Our farmers are again afforded an opportunity of feeling as well as seeing how completely they are bound hand and foot in the coils of the river monopoly. They can see—and they have been afforded almost a similar sight nearly every season for some years past—the profits of their industry entirely eaten up in paying freight on their products to a market. They can see that there is no probable end to this extortion—that more than likely every coming season will witness a new scheme put up for robbing them. To completely toll these schemes the producers of the Willamette Valley have but to unite and build a railway to salt water at Yaquina Bay. A road can be built from this city to Yaquina Bay which, with proper guarantees, will secure low freights and fares to our people for all time to come. It will secure us an outlet that will not be affected by low water—by the heat
