One James Clark has a long letter in the Salem Mercury in which he arraigns the authorities in very bitter terms for the manner in which the Oregon penitentlary is conducted. He enumerates a great many grievances of which the convicts have reason to complain and if the prison is such a place as he describes, it is a " mighty good place to keep out of."

The republicans in most of the states will probably make no objection to the change in the laws of the several states so as to shift the authority to choose presidentia I electors from the people directly to the legislatures of the respective states. It would make the choice of a republican for president next year almost a moral certainty. In that case the balance of the states would be against Indiana and the solid south.

This method is as follows: A traction engine of twelve horse power is stationed some distance from the wood, and a wire chain is festened to the tree. Steam is then put on and the tree is pulled forcibly by the roots. Upwards of 900 trees per day of ten hours can be pulled out by this process. Blaine is reported as having gained a good deal of strength recently in New York, and some of his triends are confident that he can carry the delegation to the National Convention next year. On the other hand it is claimed that Conkling will dictate the choice of the New York delegation, and that no nomination can be made that does not meet with his approbation. It is believed that Grant is Conkling's first choice for the Presidency, but there is no known reason why he should oppose the nomination of Blaine, should the choice of the Convention tall on him.
