Who represents the Democratic party in this matter of claims? Is it Hancock, with his "persons" or "rebels," or is it Zebulon in those good old days, with his eyes full Vance, the Senator from North Carolina? of soap, groping for the towel. There was Wise people know very well which,

In Their Own States.

The name of the Republican candidate for President has sufficed to carry his own State by the largest majority it has given in many years, while the rank odor of treason and general meanness which hang about English, the Democratic candidate for Vice-President, has lost his own State to his party, though it has been steadily Democratic since 1876 and before. It is also now morally certain that Arthur's State, New York, will give him its vote, and that Hancock's State, Pennsylvania. will repudiate Hancock by a larger mrjority than it gave Haves in 1876. These contrasts do not represent the Democratic candidates in a favorable light. Men are commonly nominated for President and Vice-President because they are thought they had more gods than they had words to be popular enough at home to carry their own States. Pierce, Polk, Taylor, Albany Furniture House. Buchanan, Grant, Hayes, and even Seymour and Tilden, each won his own State, though some of them were not elected; but neither of the Democratic candidates in this campaign has the slightest chance of success at home; nor are they now likely to get a single State in that section of the Union-the North-which embraces nine-tenths of its enterprise, intelligence, patriotism and wealth.

Another Dracavery.

Prof. Swift, Astronomer of the Warner Observatory, at Rochester, N. Y., discover- By Their Fruits Ye Shall Know Them. ed another large comet on the evening of October 10th. The fact was noted in the associated press dispatches, but some important and interesting details which could not be telegraphed are herewith given. The new celestial visitor is the Constellation of Pegasus, right ascension, 21 hours, 30 minutes, declination North 17 degrees, 30 minutes. Its rate of motion is quite slow, being in a North-westerly direction, so that it is approaching the sun. It has a very strong condensation on one side of the centre, in addition to a star-like neucleus, which indicates that it is throwing off an extended tall. From the fact of its extraordinary size, we are warranted in cope for the first time upon these eccentric press it were denounced by them. b slies, and ascertain certainly what they are.

The day before the election in Indiana the Lousiville Courier-Journal said : "A vote for Landers is a vote for Hancock ; a vote for Porter is a vote for Garfield." That is about the size of it, but Henry may not look at it that way now.

The Enquirer of Cincinnati, the evening Indiana will in all probability elect a before the 12th of October, said : "The Republican successor to the outgoing Dem-Democrats feel sure of carrying the State ocratic Senator, McDonald, the Legislature by from 3000 to 8000 majority." The having gone Republican. The majority of the Brigadlers in the Senate will finde away after March next.

Devlish Devices.

The S. F. Chronicle's special from Jacksonville, Florida, mentioned a few days ago that the Democrats of that State are trying to distranchise all men convicted of petit larceny, the object being to strike down the colored vote by malicious prosecutions and false testimony. This thing has been going on in most of the ex-slave State for years. A freedman who informed against a Richmond saloon-keeper for some violation of the license law was maliciously and falsely accused of stealing a chicken and nearly whipped to death under judgment of a Justice of the Peace. In Greensboro, N. C., a negro was maliciously charged with the larceny of "six bits" and sent to the penitentlary for five ing a box of sardines, and another the same sentence for taking an old plow. Their treatment in the penitentiary is as cruel in most respects as the treatment of slaves by Arab slave-dealers in Central Africa. And politics never worried them, either. The man with the biggest clob and longest arm was President by a quantimous vote every time, and the man who objected to the election was in the interest of science. Those were the days when a man could run for President on his shape. They were good men, these ancestors of mine, in their day. Lam not ashamed of them, because I have no reason for thinking they were ashanced of me, and if they can stand it I can. They were more reliable than I am. They prayed oftener and made more noise about it, and in their language. Col. Ingersoll's raid would have bankrupted them. They fought a little, stole some, and lied a great deal, and swore every time they thought of it, but they never played croquet, and were proof against the vanity of roller skates. There were some good things about them, after all. The best thing I know about them is their distance, their remote antiquity. I revere the rare good sense which prompted them to live and get through with it and die, and three or four thousand years before their more fastidious describants wanted the stage for their

The South must respect the amendments to the Constitution in practice as well as in theory. It is all very well to say that they accept the amendments, and they always do this cheerfully, especially on the eve of a political campaign in the North; but if they would convince the Northern people that they are in earnest they must cease to claim the right to make men vote against their convictions, they must abolish their ride clubs, and, above all things, they must always acknowledge that a Radical is as good and has as many rights as a
