G. W. GRAY, D. D. S., GRADUATE OF THE CINCINNATI DENTAL COLLEGE,

Would invite all persons desiring first-class dental operations to give him a call. The Doctor makes many new and improved styles of plates for artificial teeth. Among others he would solicit particular attention to vulcanite base in Patronize Home Industry, and Save Money connection with gold wire gauze (a superior work in many respects), and a new improvement (lat ly patented by Dr. Cool), which consists in lining the entire concave surface of the plate with fine gold. This style of plate admits of a very fine TAILORING ESTABLISHMEN' finish, and in its use there is no disagreeable blacking and roughening by tobacco smoke and other deleterious agents (as is the ease with ordinary vulcanite work), It can be made much thin ner and adds very materially to its strength and durability. The extra expense is trifling in comparison to the advantages it possesses. Persons would do well to give him a call. Office up-stairs in Parrish's & Co.'s brick, Albany, Oregon.
