TEACHING SCHOOL.

A gentleman from Swampville was telling how many different occupations he had attempted.

HOW LONG DID YOU TEACH?

"How long did you teach?" asked a bystander.

LET ME SEE YOU WALK OFF A LITTLE WAY.

"Let me see you walk off a little way," said he, "and I can tell just well's I'd heard you examined."

WONDERS OF TELEGRAPHY.

The particulars of an interesting telegraphic experiment are given by the Buffalo Courier as follows:

For the purpose of arriving at the difference in mean time between San Francisco and Boston, the wires of the Western Union Telegraph Company have recently been connected for nearly a month past from one side of the continent to the other.

At any time during an evening of the past month a visitor to the operating rooms of the Western Union Telegraph office in this city might have heard one of the little instruments beating the measured time of the sixtieth part of a minute, with the monotony and regularity of a chronometer.

One, two, three, four, five minutes elapse, and then the little monitor ceases, back comes the answer from San Francisco to Boston: "All right; your second signal came good, and have been recorded for five minutes. Go ahead five minutes more."

At any time during an evening of the past month a visitor to the operating rooms of the Western Union Telegraph office in this city might have heard one of the little instruments beating the measured time of the sixtieth part of a minute, with the monotony and regularity of a chronometer.

But notwithstanding the speed with which these pulsations of the clock fly from one side of our continent to the other, it is known there is a loss of time in the transmission. How to arrive at this loss and measure it, is the next question.

Never before in the world's history has such a wonderful feat been attempted, and that this has been brought to a successful conclusion is due entirely to the beautiful working of the Western Union Company's wires, together with the assiduous attention and superior ability of its employees.

"How long did you teach?" asked a bystander. "Wal, I didn't learn out; I only went to learn out."

"Wal, I gin it up for some reason or nother; you see I traveled into a district and enquired for the trustees. Somebody said Mr. Snickles was the man I wanted to see."

"Wal, no; I didn't apply for another school," said the gentleman from Swampville. "I rather guess my appearance was agin me."
