A SAD COMMENTARY.

An exchange illustrates the effect of the protective system upon American industries by pointing to the great Novelty Works in New York. These works employed from 1,500 to 2,500 hands. They were engaged in building marine engines. To-day may be seen over the door of this once active and flourishing establishment the sign "To let." WHAT WE SAW AT SALEM.

Last Saturday morning we arose with the lark (a guratively speaking, for there really weren', any larks foolish enough to get up on such at ugly morning as that was,) and took the 7 o'clock train for the Capital. While going down on the cars we were surprised at the great improvemen in the road since last we had passed over it. The cars moved along as smoothly as do those upon many of the older roads in the Eastern States There has certainly been excellent work performed in ballasting and leveling the track, and we cannot fail to commend those who have had that department in charge. If the managers of the road would bring their price of passage down to some thing like a reasonable figure, we would expecto ride over the road occasionally just for the you, which I have seen with my own eyes, pleasurable sensation which one experiences;but at the rate now charged it is too "costive" a luxury for one having only a limited exchequer Well, in due time the brakesman thrust his head into the car and shouted out
