A grain of iron may be divided into 4,000,000 parts. Russia has 21,000,000 horses and

Turkey but 1,000,000. Greece contains 6552 Protestants to 6013 Roman Catholics.

Gold may be hammered so that it is only 1,500,000th of an inch thick. Baron Rokitansky, the surgeon of Vienna who died recently, dissected 30,000 corpses.

During the recent bull fighting season at Madrid 90 bulls and 143 horses were killed.

the present Governor of Ohio is the head, is said to have been caused by a want of confidence, inspired by the recent visit of Mr. Hayes to that State.

The richest bachelor in the country is said to be Peter Goelet, of New York, his property being estimated at \$10,-He is now seventy-eight years of age, and is perhaps still a pos-sible "catch" for some aspiring husband seeker.

Statistics from Dr. S. M. Bemis, of Louisville, Ky., show that of 2,778 de-scendants of first cousins, 793 were defective; 77 deaf and mute; 63 blind; 231 idiotic; 24 insane; 33 epileptic 189 scrofulous; 53 deformed; and 627

limbs and her life almost, by the ex-cessive use of cloves. A skillful doc-tor and the adoption of a less spicy diet have restored her to a measurable degree of health.

Virginia has established the whipping post, and in future stripes are to be inflicted upon persons convicted for the first time of petty larceny, except when, in the discretion of the Court, the condition of a female prisoner may make whipping inadvisable.

Goldwin Smith's theory that American manufacturers are only good at coarse work, has just sustained another severe shock. Mr. Humphrey, of last year's British Rifle Team, has been shooting this year with an American rifle, and won the Cambridge cup (£50)

Mrs. Jonas Hay, who lost her scalp by her hair being caught in machinery, at Jamestown, N. Y., has had the covering of her cranium restored through the contributions of skin from her friends. Thirteen hundred and seventyeight pieces of flesh have been en-grafted on her head.

A legal bushel of oats in Maine, New Hampshire and New Jersey must weigh 30 lbs.; in Canada, 34 lbs.; in Oregon, 36 lbs.; in Missouri, 33 lbs.; in Iowa, Massachusetts, New York and most of the other States, 32 lbs. The weight should be uniform throughout the United States and Canada.

No one can read the newspapers nowadays without becoming impres with the fact that Dr. Mary Walker's trousers successfully fill the position in journalism formerly occupied by Horace Greeley's oid white hat.—Norr. Herald. Do you mean that she pulls 'em on over her head?—Phil. Bull.

An inventor in Brussels has devised an electric bridle with which the driver, by pressing a little knob on the reins, can cause an electric current to act on the corners of the horse's mouth in such a way as to make the most intractable animal docile in a few minutes. The surprise of the horse at the novel sensation is evidently so great as to leave him no power to attend to any-

The two rooms occuyied by Voltaire in his chateau at Ferney have been kept lovingly and reverently as he left

This question has been much disting and healthy character. This question has been much discussed among scientific men during the past few years; the results are such as to demand the attention of all who reside in malerious country, and can hardly fail to convince all that there it are all the elements of malarial discussed are all the elem

pedition observed an entire absence of ing Tree ! ague and fever in that part of the world, and were thus led to inquire as to any local causes which could account for the absence of these diseases in places where the elements of malaria abounded,

the season in which the fever usually appear, the farmers were completely

died early.

A young woman at Troy, Vt. lost for the workmen of the great Iron mines of Motka El Hadid in French forty pounds of weight, the use of her life almost, by the exsummer; those who attempted to do so summer; those who attempted to do so died, and in order to work the mines the company was compelled to take the laborers to the mines from a distance by railroad every morning and carry them back at night. The company planted more than 100,000 Eucalyptus trees, and now the laborers are able to live all the year through at the scene of their labor. The entire works, and the railway leading to them are bordered with thick belts of these trees, and each of the miners has his cottage and garden surrounded by them.

The following is condensed from a surrounded by them.

Dutchy? Shure and there's other papie got moony in this bank besides yersilf." "Howyou vas know I vas Tutch, you ole Irish potatoes pags?" returned the German, pretty mad. "Shure and rich country, well adapted to the growth the Lirishman.

East of Milivitle, after ascending the Sierras come 500 feet, we enter upon the irult belt and pass on for miles over a timbered and rich country, well adapted to the growth the Irishman.

The crowd swayed to and fro, pushing and tramping. "Ouch, my toes!" says one. "Put your toes in your pocket," replies another. The siege almost equaled that of Sebastopol. G. the banker, who was cool, calm, and surrounded by them.

The following is condensed from a surrounded by them.

Fever-Destroying:"

Such was the serious complexion of "In the Eucalyptus tribe we have a affairs when, in the midst of all the vegetation absolutely Australian, as it excitement, Smithers, the well-known exists in no other part of the world exexists in no other part of the world except where it has been planted from Australian seed. If, therefore we possess in a very high degree an immunities from fever maladies, can it be traced in any way to this order of vegetation? For this purpose I propose to refer to the chemical properties of the Eucalypti as a whole, and specially to those which are known to possess curative and anti-malarious qualities. The chemical contents of a Eucalyptus tree are neither poisonous nor virulent; they include a Tannate Gum Resin, a Volatile Acid and a Volatile Oil, possessed by no other plant in existence.

It is in these three bodies we have the key to the question before us. Part.

what is its probable sanitary effect. "There are upwards of 150 varieties send me word." of the Eucalyptus tribe of vegetation; The effect was electrical. People besome of them have their medicinal gan to feel assured, and, as confidence qualities in the leaves, some in the bark was gradually re-established, first one, (which is very bitter), and others in the nanother could be seen pressing his the juices which exude from the tree or their way through the crowd, nearly in the form of gum. All the species as anxious to get out and take their deare more or less medicinal in the leaves, wood, or gum. Some species are emi-nently so, and contain such extraor. hour's time the crowd had entirely disdinary curative properties as would hardly be credited, were they not well completely subsided. Others who attested by so many eminent scientific men. Four-fifths of the area of facts, would tear up their checks and The two fools occurred by Voltaire in his chateau at Ferney have been kept lovingly and reverently as he left them. His little eleeping apartment with its trackle bed and its walls hung round with portraits—among them Milton and Newton—is exactly the same as when he died there a century ago. Unchipped too, by Cook's tourists' knives is still the black sarco plagus in which his heart in interned.

Under the Tweed administration of one year (1868), Judge McCunn'scourt in New York city issued 26, 226 naturalization papers in twenty-three days, and another court over 10,000 in fourteen days of the same month, making more than 36,000 voters. The papers were fraudulent for the most part. The holders of 4000 are known and are called upon by the United States Attorney to aurrender them to avoid procedulen.

Is Australian Vegetation a Preventive agency existing in our vegetation over of Malarial Disease? all known evidence, it is of an invigora-

possesses a wonderful power to counteract ague and all malarial disease.

Aftention was first called to the subject by a French exploring expedition which visited Australia many years ago.

The surgeons connected with this extra absence of the first possesses a wonderful power to counter the disease around, but in those parts of Australia where they do not grow, the full effect of malaria is felt, and fever and ague prevails. Nothing the writer can say could add to this amount of evidence, that the Encalyptus is a Fever-destroy-

Exciting Run on a Bank.

Mr. Joseph Smithers is a retired banks of the second to the sec banker, worth, it is said, two millions of dollars. About twenty-five or thirty namely: a warm climate, and an abund-ance of decaying vegetation, and swampy lands. The most prominent fact which arrested their attention was

doors were thrown open the rushing and jamming was terrible to behold. Men with pale faces were there, some free from it, though the trees had scarcely attained a height of more than of them hatless, others coatless, and eight or ten feet. Since that time the poor women with their haggard counsettled population has been entirely free from fevers."

On the banks of the Var is situated tenances, fearful of losing their small pittances, all they possessed upon earth.

One old colored woman edged her way "On the banks of the Var is situated a garrison house; the malaria made it necessary to change the guard each year; two years ago M. Villard, the engineer in charge, planted a number of Encalyptus trees in the vicinity of the buildings, and since that time this post has been the most healthy in the country."

The following is the latest evidence obtained: Fermerly it was impossible for the workmen of the great Iron

One old colored woman edged her way through the crowd, saying: "Ise only got \$11, but breas your life, honey, I wants dat shoo, and I isn't gwine to leave the first through the crowd, saying: "Ise only got \$11, but breas your life, honey, I wants dat shoo, and I isn't gwine to leave the first through the crowd, saying: "Ise only got \$11, but breas your life, honey, I wants dat shoo, and I isn't gwine to leave navigation, if occasion should require and in massy places siletia, no irrigation is continue and fruiths additional facilities for transportation by narrow guage railrude and river navigation, if occasion should require and in massy places siletia, no irrigation is continue and furnish additional facilities for transportation by narrow guage railrude and river navigation, if occasion should require and in massy places siletia, no irrigation is more provable and in massy places siletia, no irrigation is more street positives. The following is the latest evidence obtained: Fermerly it was impossible golt vas all gone! Vas I vill doen? Und mine poor frow und mine childrens."

Deer abound in rearity and grant is mount in the distinct of the Grant is such that its future population to easily such that its future population is such that its future population is such that its future population is callities for transportation by narrow guage railrude and river navigation, if occasion should require reversable to the five reason and in massy places siletia, no irrigations in mas

The following is condensed from a now almost began to lose confidence aper read before the Royal Society of himself, and manifested considerable Melbourne, Australia, by the President, fear, as was plainly visible as to the re-entitled, "Is Australian Vegetation sult, should the run still continue."

Such was the serious complexion of

the key to the question before us. Part was deposited behind the counter, and, of these constituents is retained in the state men piled it up in full view of tree till set free by the art of man, and the dare Smitham in the dare smitham in the later. part is given off to the air by the forces of the plant in union with atmospheric agencies. Let us therefore inquire over the room, exclaimed:

"If you want any more, Mr. G., just

Environed With Danger,

The dweller or temporary sojourner in a malarious region of country is environed swith danger. Besides inhaling at avery breath an atmosphere saturaired with an infectious poison, he also drinks water which is in most instances likewise impregnated with the fever and ague breeding masanata. It is billious subject, deficient in stamins, or irregular in habit of body or digestion, his peril is much increased, as these obnormal conditions are extremely favorable to the contraction of malarial dinease. But this danger may be safely encountered with the assistance of Hostetter's Stomach Bitters, which completely mulliflues the atmospheric virus, and neutralizes the constituents of milasma-tainted water. This benign antidote to discase eradicates and prevents fevers of an intermittent and billious remittent type, besides effecting a thorough and permanent of those sufception of those sufception of these suffering a translated presents. an intermittent and billous remittent ly; besides effecting a thorough and permane reform of those enfectied or irregular co ditions of the system which invite not on malaria, but other diseases equally to

The Reading Grant for Sale.

in the mountains above.

Wood and water are plentiful and easy to get. Oak timber is in the majority. Good well water, unfailing in quantity, is reached in from 10 to 35 feet, according to location. The draluage is such that very little damage is ever done by the heaviest floods. All the surplus water drains off in a few days. Good roads for hading extend all over the Read-ing Grant. The situation of the Grant is

markably and have a richer flavor than in the valley.
We advise parties interested to call on Mr.
Frishie, or send for his illustrated circular.

New Era Coffee.

The introduction of this new candid ste, for popular favor is undoubtedly destined to effect an almost cutire revolution in the coffee trade. It has been thoroughly tested coffee trade. It has been thoroughly tested by the medical profession of our city as well as by a large class of our best citizens and the verdict is universally in its favor. It is pleasant to the taste, being free from the bitter taste peculiar to imported coffee. It is very much cheaper, and what is its most important recommendation it is absolutely free from any ingredient that will be injurious to the health. Every physician who has tested it, pronounces it the most wholesome and neutritious beverage yet introduce to the public. We heard the opinion expressed but a few days since by one of our leading grocers that it would in a short time, to a great extent, supercede for family use the imported article. It is claimed, and we believe justly, that it possesses all of the good qualities of the best Java or Mocha, while it has none of their detrimental qualities. We advise our readers to give it a trial.

A Credit to the State. A Credit to the State.

Among the exhibits at the Mechanics Fair just closed, at San Francisce, we would mention that of Waterhouse & Lester. They occupied quite a large space nontily arranged with everything in the bardware line used in the manufacture of carriages. Their display of woods was probably the best ever seen on the Pacific Coast, including wheels of their own manufacture as well as hubs made from California locust. We have not space to go into the details, but no carriage manufacturer could fail to examine their display with pleasure.

Hats for Everybody. C. Horrmann, the Hatter of San Francisco, has issued an illustrated catalogue of his Fall styles of hats. The pamphlet is very beautifully gotten up and contains afty-six illustrations of his various styles of Fall Hats.
