

PROCLAMATION.

By the Governor of the State of Oregon.

Through a sense of gratitude for the many benefits and blessings enjoyed by the people of this State during the past year, and in compliance with a venerated custom, I hereby appoint Thursday, the 28th day of the present month, as a day of Thanksgiving.

In testimony whereof, I have hereunto set my hand and caused the great seal of the State of Oregon to be affixed. Done at the City of Salem, this 6th day of November, A. D. 1878.

W. W. THAYER, Governor of Oregon.

By the Governor: R. P. BARNHART, Secretary of State.

STEEL SHARPING.

The Oregonian still continues to harp on the matter of State Printing. If that paper will refer to Mr. Hick's report (the sworn expert in 1874), it will discover that Mr. Carter, the present State Printer, while acting as expert for Mr. Pitcock (proprietor of the Oregonian), is about the only man censured for over-allowance on paper. Again, Mr. Aashel Bush, at one time State Printer, received just twice the amount of compensation allowed to Mr. Brown, as State Printer, and the journals printed show most extravagant expansion in paragraphing and equal lines, and yet the virtuous Oregonian has no fault to find with Messrs. Pitcock or Bush!

There should be a limit to even the shamelessness of a common journalist prostitute.

The Oregonian must stick to the record or go to the wall.

TILDEN'S ECONOMY.

The New York Sun thus clearly states the facts in relation to the income-tax case of Mr. Tilden, out of which the Radicals are endeavoring to make political capital at his expense: The law provided that if any citizen did not make a return of his income, the taxing officers of the Government should themselves assess the amount of that income, adding thereto fifty per cent. of that amount as a penalty for the failure to make said return; and that this tax should be collected. Being himself unable, as we understand, through the uncertainties and the unsettled nature of a large business, to ascertain with sufficient accuracy to swear to it, what his income really was, Mr. Tilden made no return. The assessment was therefore made; and the fine was added, and the tax duly paid. The case was thus fully settled upon the Government's own terms. And yet, twelve or fifteen years afterward, because Mr. Tilden is the Democratic candidate for President, the Republican Administration brings a suit against him! This, we say, is a political persecution, indecent in its nature and incredible to those by whom it is urged and promoted. In a popular government the use of judicial process as a means of a partisan warfare and official oppression is the natural resort of man, who, if they had the power, would be tyrants; but we have never known a more atrocious instance of this abuse than that in the case in point.

INDIAN GOING EAST.

The Bee says John Monteith, formerly of Albany, but now agent on the Nez Perce reservation, arrived at Portland last Friday accompanied by three Nez Perce Indians, i. e., James Reuben, nephew of Chief Joseph, Archie Lawley, son of the late Chief Lawyer, and Mark Williams, one of the most intelligent of the tribe. These are all young men, robust, finely formed fellows, with pleasant, intelligent faces. They were educated on the reservation and now read, write and speak English fairly. Reuben was assistant teacher and has written a fair account of the Nez Perce war, published by the department at Washington. He was also one of General Howard's most valuable scouts, though but 16 years of age, a savage irreclaimable fellow with whom Agent Monteith had much trouble. They are now en route to the Indian Territory on a visit to Joseph, with whom Reuben has kept a correspondence since his capture. These three Indians have considerable stock in Idaho and are in good circumstances. They may conclude to remain with their people and endeavor to make them good, honest and industrious Christian men and women. Mr. Monteith may conclude to take them on to Washington before he returns, as he received the necessary authority from the Government. Twelve Nez Perce prisoners, part of White Bird's band, under the leadership of Chief Talsahoga, guarded by an army officer and six men, also accompany them to join Joseph's band. They departed last Tuesday on the steamer San Francisco. The Nez Perce now on the reservation number 1162 persons, and the scattering bands of the same tribe will perhaps reach 500 more, a total of 1662. Mr. Monteith has been agent for eight years, and by his effective honest administration has earned the love and confidence of his wards.

PEN AND SCISSORS.

Jeff. Davis, Jr., son of Hon. Jeff. Davis, died near Memphis, a few days ago, of yellow fever. He was 21 years of age.

The public debt of France is about \$4,500,000,000. The debt is held at home mostly, at a low rate of interest. The population of France is 38,000,000. France was forced to pay Germany \$1,100,000,000 in round numbers.

GREENBACKS reached its flood tide in Ohio last year, since which it has been on the decline. In Hamilton county where the party polled 9,000 votes in 1877, it polled 800 this year, and in the whole State it polled but 29,000.

THERE are \$130,000,000 invested in gas stocks in Great Britain, and the fear that Mr. Edison's new application of the electric light will render gas useless has caused something like a panic among those whose wealth is invested in these securities.

TOTAL vote of Iowa, 1877, 245,766. Total vote of Iowa, 1878, 253,377. Republican plurality, 1877, 42,193. Republican plurality, 1878, 8,182. Republican loss in one year, 32,011. And when Iowa strikes this year, the "oldest Republican" must conclude that the foundation of things are breaking up.

The population of Paris is one-eighth that of France, and pays nearly as much as all the rest of France put together in local taxes. Paris is taxed \$20 per head of its population. The rest of France pays only about \$1.20 per head of the population. Lyons, which ranks second on the list of towns with the largest local expenditure, pays only about \$6.80 per head of the population. Marseilles pays a little more. No other town nearly approaches Paris.

CLEOPATRA'S NEEDLE has been the subject of no little comment since its removal from Africa to London. This colossal obelisk, now standing on the Thames, contains within its pedestal, a jar containing the Bible in French and English, an Arabian Genesis, a Hebrew Pentateuch and a verse from the 3d chapter of St. John in 215 different languages. There are now but twelve colossal obelisks standing on the face of the earth. Five in Egypt, four in Rome and one each in Paris, London and Constantinople.

DISPATCHES from the South tell us that physicians have reported 1,500 cases of yellow fever treated by them during the epidemic in New Orleans and not heretofore reported. Maj. H. W. Branham, of the Howard Association, who is now assisting in making a report of the work of the Howard in 1878, expresses the opinion that there have been, during the past four months, 30,000 cases of fever in New Orleans and vicinity. The Howard Association physicians did not report to the board of health.

EX-GOVERNOR Horatio Seymour discourses thus: There must grow out of the industry which produces and the commerce which exchanges, what we make for what we want. We must not let the currency question throw in to the shade other vital things. We must answer this eager question of men in trouble. They wish to know, when they will get relief, and how! They will get it when we have enough to sell and when we can sell it. This gives relief at once, even if we had no currency to make more easy the work of buying and selling.

A ROCHESTER (N. Y.) newspaper has been called upon to tell how he obtained certain information published in his paper bearing on a trial now pending, declined to answer, on the grounds that disclosure by him of his informant or informants would seriously injure him in his business. As a newspaper man, that the information had been imparted to him under the pledge of secrecy, and that all communications to a newspaper man should be privileged, the same as communications between lawyers and clients—and the court sustained him.

THE cipher dispatches, it is admitted to be all that is claimed, prove too much for the Republicans; unless, suggests the Baltimore Sun, we assume that Returning Boards and Electors, known to be corrupt and willing to sell out to Democrats, were incorruptible by Republicans, we must admit not only that these cattle were bought wholesale by the Republican managers, but that they were bought at higher prices than they were willing to sell out to the Democrats at. For they only asked Mr. Tilden's friends and agents to pay them to do right, to announce the actual vote and the popular decision; whereas, if they were bribed by the Republicans at all, they were bribed to do wrong, to commit felony, to forge returns, make false oaths, perjure themselves, and do that which would send them to the penitentiary if exposed and convicted. Hence, if such laborers were worthy their hire, they must have cost Mr. Z. Chandler and his associates considerable more in money and office than they were willing to bargain for with Mr. Tilden's agents.

PACIFIC COASTERS.

Wasco county scrip is at par. Diphtheria prevails in Jackson county.

The McMinnville college is prospering. The fall crop of wool in Jackson county was heavy.

Ira and John Campbell have bought the Eugene City Guard.

W. H. Byars has withdrawn from the Roseburg Plaindealer.

A great many logs are being packed in various parts of the State.

The Jacksonville papers speak in the highest terms of Morrell's ministers.

The salmon ran on the Sitkum and the Umpqua continues unimpaired.

Work has been suspended on all the Cinnabar leads on Beaver Creek, Jackson county.

1,500 pounds of rock from the Fort Lane quartz mine recently yielded \$216 in gold.

Three hundred tons of salmon was shipped on the Cassie Telfair from the Sitkum last week.

John Ashmead, of Rogue river raised 1,000 bushels of corn on five acres of land, this year.

Entries of timber land under the "40-acre" law are very numerous at the Walls Walla land office.

Coot Bay is swarming with salmon and the Ynes wants to know why they are not caught and canned.

The Eugene Guard says there has been more fall wheat sown in Lane county this year than ever before.

Mexican dollars bought in San Francisco for 89 cents, are passed on the people of Coot Bay for 100 cent dollars.

Mr. Sale, of Baker county, raised 40,000 pounds of turnips on one acre this season. Ten of them fill a wheat sack.

"A party by the name of Johnson" has just left Jacksonville, a horse and \$30 ahead of a too confiding acquaintance.

The population of Stevens county, south of the Spokane river, has doubled within the last six months, according to reliable authority.

H. York, of Josephine county, gathered from one acre of corn ninety-five bushels, his whole crop averaging about sixty bushels to the acre.

There are 2,000,000 feet of logs now in boom near the mouth of the Skagit river, awaiting a favorable opportunity to be towed to market.

Rev. H. Lyman, of Pacific university, has returned from Walls Walla and is in very feeble health. His son, W. D. Lyman, is teaching in his place.

Clark Smith, U. S. deputy surveyor, left Cornelius Nov. 3d, 1878, with a crew of men, for his surveying contract on the Yaquina, in Western Oregon.

Linkville, the old pioneer town of the Lake country, is growing rapidly. No less than a half-dozen new buildings are now going up and we hear of many more to arise in the near future.

There are twenty-four counties in Washington Territory, containing a population of 50,000, and yet the taxable property for 1878 is quoted at \$18,930,964, or about \$379 per head.

The Pacific Threshing Machine Co.'s works and foundry at Salem were sold at auction on last Friday. Thomas Holman was the principal purchaser, he having bought the finished and unfinished horse-powers; he procured them at extremely low figures. The stove patterns and flasks were purchased by John Patterson who intends to resume the manufacture of stoves.

Geo. W. Snyder and A. Y. R. Snyder are now equal partners, under the firm name of Snyder Brothers, in the publication of the Yamhill County Reporter, and the Lafayette Courier, and in the general job and publication business pertaining to the two offices.

Geo. W. Snyder will hereafter be the manager of the Reporter, and A. Y. R. Snyder will be manager of the Courier.

Pendleton Independent's Work on the quartz mines is progressing. The Monumental Co. are working the mines, having run their tunnel over 700 feet, and are now running an adit for the purpose of ventilation. This company intend to prosecute their work throughout the winter, and erect a mill next spring. The Ratler and Phil Sheridan mines are also being worked to a considerable extent.

Col. Hogg's advertisement in the Coquille Gazette as follows: "Program" will be received by the undersigned at his office in Coquille, Oregon, got getting out and delivering 34,000 railroad ties on or before the 1st day of June 1879. Said ties to be eight feet long, flattened on two sides, to face eight inches, five inches thick, and to be delivered at points to be agreed upon, on the line of the first ten miles of the Willamette Valley and Coast Railroad. Proposals should state where contractor prefer to deliver ties, and the price of ties delivered at such preferred point.

This wheat crop in the United States in 1878 was 400,485,444 bushels; in 1879, 1873, 104,924 bushels; in 1869, 287,749,399 bushels; in 1876, 289,366,500 bushels. In the time of Washington the production has grown from 5,306,278 bushels in 1849 to fully 125,000,000 bushels in 1878. The Atlantic coast produced in 1849 about 52,000,000 bushels and in 1878, 89,400,000 bushels; while the central belt has increased its production from 44,000,000 bushels to 129,000,000 bushels in the course of twenty-nine years. For 1878 the production of the central belt will probably touch 150,000,000 bushels.

SENATOR BURNETT.

The following biographical sketch and complimentary mention of Hon. John Burnett, Senator from Benton, we find in the Salem Statesman. Although often well merited, it is rare that a Republican paper speaks so favorably of a prominent Democrat:

John Burnett, of Benton, was born in Pike county, Missouri, July 4, 1831, crossed the plains to California in 1849, and settled in Benton county; was elected prothonotary in 1850, and in 1851 County Judge; in 1870; was elected Judge of the Supreme Court in 1874, and State Senator in 1878; was married in 1859; has five children. Mr. Burnett is a man of medium height, impressing one as having a strong, firmly knit frame, with nerve and character to correspond. From what we saw and heard of him in the Senate, we should judge him to be the best lawyer on the floor, his arguments showing a perfect knowledge of his subject, which was always handled in a masterly manner. His voice was not so pleasant as that of some other speakers, but what was wanting in this respect was made up by true dignity of manner and thought. Mr. Burnett had two bills passed, one to provide for the support of the Agricultural College and one relating to foreign corporations, and his weighty arguments had much to do with the passage or defeat of many others.

When an impetuous wine liberator strikes Amity, the "boys" arrange themselves in a double line outside the saloon door and make the poor devil run the gauntlet. When he reaches the end of the line he looks as if he had been run through a sausage machine.

A little fellow not eight years old named Charley Munster found \$70 belonging to Mr. Myers, of Salem, which he honestly handed over and received \$10 as a reward. Charley, you will never get elected to the Legislature on the Republican ticket.

Goldmine has been settled upon by the voters of Kiekiak county for their county seat.

THAT FAT PERSON CANNOT BE FOUND. Not even Edison, with all his inventive genius and extraordinary success, has been able to find a fat person who will not give up his fat for the sake of a few dollars. The fat person is a rare commodity, and is not to be found in any of our cities. It is said that a fat person was once found in a remote corner of the earth, and that he was sold for a large sum of money. But he was soon found to be a fraud, and his fat was found to be nothing more than a mixture of oil and water.

MR. MINNIE'S VEGETABLE NEPHROSTIC. Will cure all diseases of the Kidneys, Bladder and Urinary Organs. Hundreds have been cured of all kinds of urinary troubles, including Catarrh, Stricture, Hematuria, Gravel, and all kinds of urinary diseases. It is a pure and safe medicine, and is sold in all the principal cities of the United States. It is sold by all the leading druggists, and is also sold by the author, Dr. J. C. Minnie, at his office, No. 123 Broadway, New York City.

INVESTORS AND PATENTERS. Should send for instructions, terms, references, etc., to Ellison Brothers, Solicitors of Patents, No. 123 Broadway, New York City. They furnish the same without charge, and are well known and successful in all the principal cities of the United States. They have a large stock of patents for sale, and are also agents for the sale of all kinds of machinery and other articles.

THE CENTRAL LINEMENTS are of two kinds. The White is for the human family; the Yellow is for horses, sheep, and other animals. It is a powerful and reliable remedy for all kinds of urinary troubles, including Catarrh, Stricture, Hematuria, Gravel, and all kinds of urinary diseases. It is a pure and safe medicine, and is sold in all the principal cities of the United States. It is sold by all the leading druggists, and is also sold by the author, Dr. J. C. Minnie, at his office, No. 123 Broadway, New York City.

THEY ALL TAKE IT. When the system is run down to the extent that you feel sleepy nights, are nervous and irritable, have gloomy forebodings, poor stomach, sick headache and coated tongue, and are generally in poor health, it is the time to take Dr. J. C. Minnie's Vegetable Nephrostatic. It will cure you of all these troubles, and will also cure you of all urinary troubles, including Catarrh, Stricture, Hematuria, Gravel, and all kinds of urinary diseases. It is a pure and safe medicine, and is sold in all the principal cities of the United States. It is sold by all the leading druggists, and is also sold by the author, Dr. J. C. Minnie, at his office, No. 123 Broadway, New York City.

LIVER THE BIRD. The liver is the imperial of the whole system, and is the seat of all the vital forces. It is the organ of the digestive system, and is the source of all the energy of the body. It is the organ of the circulatory system, and is the source of all the blood of the body. It is the organ of the excretory system, and is the source of all the waste of the body. It is the organ of the reproductive system, and is the source of all the life of the body. It is the organ of the nervous system, and is the source of all the intelligence of the body. It is the organ of the muscular system, and is the source of all the power of the body. It is the organ of the respiratory system, and is the source of all the life of the body. It is the organ of the circulatory system, and is the source of all the blood of the body. It is the organ of the excretory system, and is the source of all the waste of the body. It is the organ of the reproductive system, and is the source of all the life of the body. It is the organ of the nervous system, and is the source of all the intelligence of the body. It is the organ of the muscular system, and is the source of all the power of the body. It is the organ of the respiratory system, and is the source of all the life of the body.

THE LIVER IS THE IMPERIAL OF THE WHOLE SYSTEM, and is the seat of all the vital forces. It is the organ of the digestive system, and is the source of all the energy of the body.
