

The Oregon Register is the name of the new paper built up in place of the Lafayette Courier.

At last we are going to be paid back in our own coin. Since Lincoln's administration such a high tariff has been put upon so many of the English manufactures that it has amounted to prohibition and England now proposes to put a tariff on grain imported from this country to get even.

A PORTLAND correspondent of the Walla Walla Statesman mentions Democratic candidates for the U. S. Senate, to succeed Senator Grover, the names of Hon. John H. Edging, Senator L. F. Grover, Judge Shattuck and ex-Senator James K. Kelly.

SENATOR DOORIE was asked at Hot Springs: "What do you think will become of Conkling? Don't you think he will turn Democrat in the event of his defeat at Albany?"

The Salem Statesman makes considerable sport over Democratic speculations as to who will be the party candidate for the Senate next year, and intimates that Democracy will not have much to do with the election, except to look on.

Under the heading "Sly Sautel—Arrangements for Capturing the Presidency in 1884"—the Oregonian prints the following dispatch:

The plum crop on John Day valley is enormous. Grain sacks are 40 cents at Eola; wheat 70 cents a bushel; harvest hands scarce.

The warehouses of Corvallis contain about 30,000 bushels of wheat of the harvest of 1880.

The Oregon city sawmill is meeting 12 hours a day in order to meet the demand for building material.

The annual meeting of the Union County Agricultural Society will be held at LaGrand in October, commencing on the 10th.

Preparations are being made for the Grant county fair, which will be held at the grounds at Mount Vernon beginning on the 3d of October.

The present buildings in progress in Walla Walla represent a capital of \$80,000. The brick yards are unable to supply the demand for brick.

There are no idle men in Dayton, and laborers are scarce and in demand. Every day farmers come to town in search of harvest hands and return home without them.

The government is building an Indian school house at the foot of the Blue mountains, on a little stream near the stage road, in the vicinity of Old Cayuse station.

There is considerable excitement now about the recent discovery of several valuable coal veins in King county. One twelve-foot vein of anthracite is reported, and another large vein of lignite coat of excellent quality is also reported discovered.

C. M. Reed of Crosswell, is having hauled and stacked, 200 tons of hay. He will use it in feeding cattle for the market this winter.

Most of the ties which came down from the head of the Yakima are now in the boom about eight miles below Huntington's ranch. Sixty thousand have been permitted to pass through and will be taken to Alinsworth. The balance will probably be taken out at different points and there taken care of for future use.

Extensive improvements are being made in the Oregon City mills. The old wharf has been raised 18 inches and a new extension of about 50 feet is being added, and is built of crib-work filled in with stone.

From 190 acres of wheat John Moorehouse, of Unadilla county, realized 7160 bushels of excellent wheat. 73 acres on the farm of H. McArthur, yielded 2750 bushels, machine measure.

The San Francisco Journal of Commerce of Aug 11th has the following to say in relation to the wheat market.

Most people will remember the activity which marked the opening of the campaign in Indiana last fall. The Democrats made a complete canvass of the state, visiting every town and were so well satisfied with the results that they thereafter gave themselves little respite, until the result of the election fell upon them like a bolt from the blue, as Garfield would say.

Everybody knows that the result was a false one so far as registering the real political will of the people, and every body has waited to learn how and by what methods the Republicans carried the state.

Since a few republicans have entered the arena to disrupt the republican party and give aid and comfort to the enemy, I propose to have them cease talking lip and swallow their words. To this end I invite the review's attention to the secret doings of the republican party of Indiana during the last political campaign.

Yakima Record: Last week Mr. Chappell, who has a farm on Parker bottom, on the lower Yakima, sent us a sample of dry grass measuring nine feet in length. From a note sent us at the same time we learn they had roasting ears on the 24th ult., which were raised on sage land without water.
