It was a terrible wound and one from which he will not soon recover.
New Process Flour.
During the past week our family have tried the "new process" flour now being manufactured at Monteith's Mills, and they pronounce it fully equal to any they have ever used. It is a good strong flour, and makes up nicely in any shape, and as soon as its good qualities are known it will be used largely by our people. Mr. Monteith has made extensive repairs in his mill and no one can now equal him in the quality of flour manufacture.

1107 BURKHART BROS.
A Fine Flock of Blooded sheep.
N. White and Monroe Heider came over here from Prineville a few weeks ago by some blooded sheep, and from Mr. H. we learn they have secured quite a flock. From D. M. Guthrie, of Mt. Park city, they bought two 4 year old French Merino bucks, sired by "Bacio." Also two French Merinos, 3 year-olds, sired by Marion, a pure bred ram of the famous flock of J. D. Patterson, of Alameda, Cal. Also two thoroughbred Spanish Marino bucks, and seven head of American or Crossbred Merino yearlings.
They also secured six head of thoroughbred Spanish Merino bucks out of the Davidson flock, the wool from which took the Centennial medal for finest and best manufacturing qualities.
They also bought eight head of Spanish Merinos from Thos. Provan and one American Merino from N. Price of this county.
With the entire flock they started for Prineville on Thursday last week, and we hope have safely arrived at their destination here this. On the ranch they already have quite a number of blooded ewes and some very high grades, and hereafter will have about the best stock of Merinos in the State. In a year or so from now there will be no use in our Eastern Oregon people coming to the valley for blooded sheep, as these gentlemen will be fully able to supply them. Such enterprise as they have shown should be rewarded.
A Present From the Lakes.
If there is anything we like more than anything else it is the delicious mountain trout. At Schwartz and Henry Burmester King this—they have our measure exactly in this respect and have placed us under obligations to them several times by sending us a nice basket of trout. Al. came down last Friday and brought with him about a dozen for us, and we lived like a king for a few days. Henry has tried a great many plans for catching fish—has looked in the grass for them around the lakes and dug for them on the mountain side, but he has at last concluded that the old-fashioned way is the best. These last he caught in the water. All who contemplate going there fishing should make a note of this and then ask him "when and how to catch trout."
Mrs. Grey at St. Paul.
A letter from Mrs. A. L. Grey to her friend Mrs. Hagan at Lebanon, received last Monday evening, announces the fact that she arrived at her father's at St. Paul, Minn., about the first of this month, after having had a very tiresome trip across the plains. Her little babe suffered terribly and died the day after arriving at St. Paul. The poor little thing had wasted away until its joints protruded through the flesh. It is better that the babe is dead, than that it should live and learn the dishonor of its sire. The sorrow of its mother is great and we pity her from the depth of our heart.
A Narrow Escape.
Last Friday afternoon C. C. Cherry, of the foundry firm of Cherry & Parkes, had a very narrow escape from being maimed for life. He was working at the lathe when his sleeve caught in the crank wheel, and before the machinery could be stopped his sleeve, and vest, and a large part of his shirt were torn from his body, and the under side of his arm from his elbow to the shoulder had the skin peeled off. It was a very close call, and he escaped a terrible death.
Another Foot Race.
Another foot race has been made up between Wickwire and Colwell, who tried each other's mettle at the County Fair, and it will come off at the fair grounds on Saturday, the 29th, inst. The stakes are \$600, distance 100 yards, and it will be one of the best races we have had in this locality. Colwell came out best in the other races, and is now in training for this one, but nevertheless Wickwire has strong backers.

A STRANGE SEASON.
The present has been a strange season in the Willamette Valley; we have had little or no summer whatever, and it almost seemed springtime until snow commenced falling on the mountains around us. In many places grass had not yet dried out, and a great many vines and fruit trees produced second crops. In Mr. N. Baum's yard in this city can be seen an apple tree that now has on it the second crop this year. We have seen and eaten of the second crop of strawberries in two or three gardens. Dr. G. W. Gray, of this city, now has raspberries bearing which produced another crop a month or two ago. In our own yard we have a common shrub known as the "snow-ball," which is now in full bloom the second time this season. We also have a specimen of lint flax, three feet long and in bloom which has grown up without cultivation from seed which was shattered out when the first crop was pulled last July. What kind of a country is this we are living in?
RESCUED FROM DEATH.
The following statement of Wm. J. Coughlin, of Somerville, Mass., is so remarkable that we beg to ask for the attention of our readers. He says: "In the fall of 1870 I was taken with a violent cough, and soon began to lose my flesh and appetite. I was so weak at one time that I could not get up my bed. In the month of 1871 I was admitted to the City Hospital. While there the doctor said I had a hole in my left lung and he would not live, and he offered me a hundred dollars on doctors' last medicines. I was so far gone at one time a report went around that I was dead. I was buried, but a friend told me of DR. WM. HALL'S BALM FOR THE LUNGS. I laughed at my friends, but I got a bottle to satisfy them, when to my surprise and gratification, I began to feel better. My hope, once dashed, began to revive, and to-day I feel in better spirits than I have had for three years. "I write this, hoping that you will publish it, so that every one afflicted with diseased lungs will be induced to take Dr. Wm. Hall's Balm for the Lungs, and be convinced that CONSUMPTION CAN BE CURED. I have taken two bottles and can positively say that it has done more good than all the other medicines I have ever used. My cough has almost entirely disappeared and I shall soon be able to go to work." Sold by druggists.

A Fine Flock of Blooded sheep.
N. White and Monroe Heider came over here from Prineville a few weeks ago by some blooded sheep, and from Mr. H. we learn they have secured quite a flock. From D. M. Guthrie, of Mt. Park city, they bought two 4 year old French Merino bucks, sired by "Bacio." Also two French Merinos, 3 year-olds, sired by Marion, a pure bred ram of the famous flock of J. D. Patterson, of Alameda, Cal. Also two thoroughbred Spanish Marino bucks, and seven head of American or Crossbred Merino yearlings.
They also secured six head of thoroughbred Spanish Merino bucks out of the Davidson flock, the wool from which took the Centennial medal for finest and best manufacturing qualities.
They also bought eight head of Spanish Merinos from Thos. Provan and one American Merino from N. Price of this county.
With the entire flock they started for Prineville on Thursday last week, and we hope have safely arrived at their destination here this. On the ranch they already have quite a number of blooded ewes and some very high grades, and hereafter will have about the best stock of Merinos in the State. In a year or so from now there will be no use in our Eastern Oregon people coming to the valley for blooded sheep, as these gentlemen will be fully able to supply them. Such enterprise as they have shown should be rewarded.
A Present From the Lakes.
If there is anything we like more than anything else it is the delicious mountain trout. At Schwartz and Henry Burmester King this—they have our measure exactly in this respect and have placed us under obligations to them several times by sending us a nice basket of trout. Al. came down last Friday and brought with him about a dozen for us, and we lived like a king for a few days. Henry has tried a great many plans for catching fish—has looked in the grass for them around the lakes and dug for them on the mountain side, but he has at last concluded that the old-fashioned way is the best. These last he caught in the water. All who contemplate going there fishing should make a note of this and then ask him "when and how to catch trout."
