Murderous Assault.

Some time since Rufus Thompson, who lives across the river in Benton county, employed a young man to do farm work. About the first of last week a man, by the name of Peter McManus, supposed to be an ex-convict, made application to Mr. Thompson for work.

When Mr. Thompson gave him a job of chopping wood, it might be put in the same place as the young man's farm hand. McManus, it seems, did not like this and made complaints about it which he kept up until the following Wednesday evening when he entered into a personal quarrel with the young man calling him hard names, and finally struck at him, but the young man warding off the blow by throwing up his arm.

At this stage of the proceedings, Mr. Thompson entered and put an end to the row. It was found after the matter was over, that the young man had received a cut over the eye, on the face, and on the finger of the hand with which he warded off the blow.

McManus denied having a knife, but Mr. Thompson's son saw him picking up a knife from the floor after the affair had subsided. McManus left, and has not been seen since.

An Invitation.

The other day while Cooper Turner was coming to the city, he saw a suspicious piece of paper lying in the road, which on picking up he found to be an invitation to a party at Steve Phillips. It is so well gotten up that we have no hesitation in publishing it, with the names of the parties:

DEAR SIR AND NEIGHBOR:—You and your ladies are respectfully invited to an evening ball and supper next Friday evening at the old residence of Steve Phillips. Be sure and come and enjoy a good time. Special invitation to all friends.

J. H. CALDWELL. Friends who will be there that night. We hope you'll bear in mind. Such joyous days as we. You'll seldom ever find.

We'll do our best to please you. With joyful mind and fun. And hope you'll live in happiness. Each and every one.

Blue Ribbon Club.

There was the usual attendance and an interesting program at the meeting held last Friday night. After prayer by the chaplain a song by the choir followed. This is a new institution which, when temperance song books are secured, will no doubt be a success.

A reading by Miss Mattie Foster was well received as well as a temperance recitation by Miss Alice Scott. Rev. D. W. Cameron delivered the address, a practical, pointed affair, favoring prohibition and laying the responsibility of drinking at the people's feet. The address by choir then occurred in the shape of a few enthusiastic remarks by Dr. G. W. Gray, who enlarged upon the power of temperance singing. About ten new members joined the club, when after another song an adjournment was had for three weeks.

What Made of?

EDUCED DEMOCRAT.—Quite a discussion has occurred as to the composition of the tail of the comet. Can you enlighten us?

EARLY RISES. Certainly. At considerable trouble we have investigated the matter and, as a result, obtained a very good idea of the make-up of this morning visitor, which is trying so hard to get away from the sun. It is the effervescent steam, smoke and froth, going off from the political pot, which has been boiling for several months. Forming a nucleus in the southern heavens, it trails its slimy tail, (which by various reefs, flows from the sun looks white and bright) at an angle of forty-five degrees.

With a powerful telescope, the faces of Washington, Grant, Cameron and Conkling appear. Great numbers of stars can be seen, vivid new with rays, while even Mitchell's plume has attached itself along towards the end of the tail. Those wishing to ascertain the truth of this can do so by calling and borrowing our powerful twenty inch stellar telescope.

Thanksgiving.

Union services will be held at the M. E. Church, on Thanksgiving, Nov. 30th, at 11 o'clock in the forenoon. Following is the program, which has been arranged:

Anthem by the choir. Reading first hymn by Rev. J. W. Hollenbaugh. Prayer by Rev. G. W. Gray, D. D. Scripture lesson by Rev. J. W. Harris. Reading second hymn by Rev. I. H. Condit. Sermon by Rev. D. W. Cameron. Reading of third hymn by Rev. N. Condit. Collection for the Albany Ladies' Aid Society. Benediction by Rev. R. O. Hill.

Skating rink.

Three of our ever-remembered young men have purchased the skates of young Peter, who has been running the rink in Parrish's Hall this week, and propose to give our young people a chance to have some fun this winter, cheap. They will run a first-class rink, in which the young ladies, as well as young men, can take a part, and will devote the encouragement of all.

New cloaks, new gowns, new dress goods, new patterns, new watered silks and colored velvets, opened this week, at the ladies' Emporium.

Ladies', misses' and children's shoes, of the best make in the market, the largest selection in the city at Monteth & Seitenbach's. The office of Isam, Lanning & Co. is decorated with a new safe, weighing four or five thousand pounds, and of the most improved make.

If subscribers, receiving notices, should find the account wrong, we will be very glad to correct it, and hope they will not lay it at our feet. Miss Levitt, lately of Salem, has bought out Mrs. L. J. Powell's millinery store, and we understand will add dressmaking to the business.

After all there is a little excitement working up over the city election, and the indications are that we will have some fun if nothing else.

While the fare here to Portland on the express has been reduced 40 cents, on the morning train, it has been raised 35 cents. Where the benefit comes in we are unable to see.

A VALUABLE INVENTION.

Last Tuesday Hiram Kenton, of this city, received the patent on his magnetic gold separator. This is one of the most ingenious as well as valuable inventions ever introduced on the Pacific Coast, and will stand by the side of many of the wonderful inventions of the present time. To Mr. Kenton it will, we are confident prove a gold mine. To accomplish what it will do in all its details has been attempted by many ingenious minds, all of whom have failed, but Mr. Kenton is confident now that he has struck it right and obtained just what he wanted.

For the last four years he has made this his study, and it should be a matter of local pride that he has succeeded. The object of the separator is to separate the gold from magnetic sand and other substances, one of the most troublesome being particularly near the ocean. The plan of doing this is really ingenious, and shows a thorough knowledge of magnets, etc. A series of copper pans, are arranged in a wooden sluice, which may be divided and doubled or trebled as the sluice descends, each pan being lower than the one above, and at the same time depending. On the bottom of the pans, quick-silver is spread, forming a coating, without eating the copper. In each of the pans perforated copper plates are fitted, and under each are a series of large magnets, from fifty to a hundred and fifty, according to the size of the separator. Over each of the pans, running from the sides of the sluice are two beams, through which copper screws partly incased in zinc are run, resting on the copper plates. The sand, water, etc., are thrown into a perforated arrangement at the top, which throws off the large substances and allows the sand, gold, water, etc., to pass down through the sluice over the perforated plates, and, forming a perfect riffle. The quick-silver attracts the gold, but to oppose this enemy, the copper plates are given a negative power, repelling it, while the zinc on the screws having a positive force attract it, and at the same time by reason of the copper pins being connected with the plates below, an electric current is formed and it is continued on through the sluice. When this is done the gold is easily taken from the quicksilver.

Mr. Kenton is just finishing one of the separators for a gentleman in Oakland, Cal., who is very enthusiastic over its virtues. It will be able to throw off at least a hundred tons of sand a day. In the tailings alone he found \$5 to \$10 to the ton and considerable higher in many cases. Only a short mathematical demonstration will tell what it will do. At the cost with a small separator, where the sand only yields about a bit to the ton Mr. Kenton makes \$8.37 in two days.

New Directory. C. W. Watts, assisted by Geo. W. Humphrey, is getting up a directory, which will probably be the best ever published in this county. Mr. Humphrey is now soliciting advertisements for it, and should be rendered all the help possible.

One of the best features of the work, one also worth several times the price of the book to any business man, farmer or merchant, will be a list of all the taxpayers of the county, with the amount they are assessed at, the amount of their taxes, and what they pay the taxes on. In addition will be a list of all the business men of the county, classified under the heads of the different towns, with interesting accounts of each, and many important facts, statistics, etc., about the county and the places in it. This is an enterprise which our citizens should not be slow to see the benefit of it.

Reduction of Fare. The Oregon and California railroad have announced reduced rates of passenger fare between all points on the east side division. A like reduction has been made between all other points.—Oregonian.

Resolutions of Constables. The following resolutions, in reference to the death of Mr. Russell Alfred, were adopted by Harrisburg Grange No. 11, P. of H., Nov. 11th, 1882.

WHEREAS The Divine Master, in his ruling of the universe, has seen fit to remove Bro. Russell Alfred from our midst, and

WHEREAS It is met that we should place upon record some recognition of this sad but unavoidable event, therefore be it

Resolved That in the death of Bro. Alfred, this Grange has lost one of its most efficient and active members; the community an upright and honorable citizen; his wife a wise and affectionate husband; his children a careful and provident father; and that, while we bow in submission to the mandate that must, sooner or later, come to all, we realize that his place can never be filled.

Resolved That we extend to his family and relatives our most heartfelt sympathy in this, their sad affliction.

Resolved That these resolutions be inscribed in the minutes of the Grange, a copy furnished to the family of the deceased, and that they be given to the press for publication.

KALAMAZOO, MICH., Feb. 1903. I know Hop Bitters will bear recommendation honestly. All who use them confer upon them the highest encomiums, and give them credit for making cures of all the proprietors claim for them. I have kept them since they were first offered to the public. They took high rank from the first and maintained it, and are more called for than all others combined. So long as they keep up their high reputation for purity and usefulness, I shall continue to recommend them—something I have never before done with any other patent medicine.
