

The Democrat.

Official County Paper.

Entered at the Post Office at Albany, Or., as second-class matter, May 1, 1883.

FRIDAY, JUNE 22, 1883.

OUR AGENTS.

Following are the DEMOCRAT'S daily authorized agents to receive subscriptions or money for the same:

Harriburg, Sam May
Brownsville, O. P. Coshaw
Halsey, T. L. Porter
Shedd, T. L. Porter
Salem, W. R. Kelly
Jefferson, W. A. DeVany

STITES & NUTTING.

Editors and Proprietors.

FRIDAY, JUNE 22, 1883.

Additional Local on 2nd Page.

A Seventy-five Pounder.

Tuesday morning a monstrous chinook salmon was seen on First street. It attracted universal attention, for nothing so monstrous is in the habit of navigating our streets. Many were tempted to call it a whale or what not. A short greeny man stepped up and said, "I declare that is as tall as I am," and then some one said, "It weighs it in a whole other way, like Jonah." Further inquiring divulged the fact that it was a genuine chinook salmon sent as a present to Mr. Thos. Monteth, of this city, that it was four feet one, three inches the other and weighed 75 pounds.

It seems that Mr. Monteth while at Astoria lately was in the canneries of Jas. Williams, at Taney Point, when he was wondering why he never saw any of the larger fish on the valley. As a result Mr. Williams shipped this salmon, the king of edible fishes, and now Albany knows what it is to see a 75 pound salmon.

Temperance 4th of July Celebration.

Seyton people are making arrangements for celebrating the 4th by giving a temperance program. The usual order of exercises will take place in the forenoon, followed by a basket picnic at noon, and amusements of all kinds as well as speaking, etc., in the afternoon. Following are the officers of the day:

President—Hon. G. S. Dowling.
Vice President—J. C. McCauley, of Seyton.
Second Vice President—J. S. Morris, of Seyton.
Third Vice President—J. D. Darby, of Waldo.
Fourth Vice President—J. Hunsaker, of Marion.
Fifth Vice President—L. Bleaney, of Turner.
Sixth Vice President—Edmund Sigmond, of Melama.
Reader of Declaration—Robt. Ashby.
Orator—Will C. Kline.
Marshal—W. W. Martin.
That Hele.

A few weeks ago an interesting account of a relic in the shape of an old newspaper, published in 1849, in the co-edition of Mrs. W. S. Peters, of this city, was published in many of the State papers, and has brought out some interesting facts in reference to it. The "State Journal," published at Eugene, offers the following: "We will add that the press on which the Oregon Spectator was printed from 1845 until it was discontinued is now in our office and is used in printing the Oregon State Journal." It is the earliest running press we have ever seen and is not surpassed by any other of the kind in the state. It is apparently as good and as perfect in every particular as when it was used at Oregon City in printing the first paper ever issued in Oregon nearly forty years ago.

Terrible shooting affray at Hillsboro.

One of the worst shooting affrays recorded in Oregon occurred at Hillsboro last Monday afternoon. Two men named B. H. Thomas and Z. Baker, had gotten into some dispute and were leaving the matter to arbitration, but got excited, and drew their revolvers. The wife of Thomas threw her arms around her husband and the daughter of Baker around her father, but they managed to shoot each other almost at the same instant over the shoulders of the women, and neither one lived a quarter of a minute after. Immense excitement prevailed at Hillsboro, as both men were well known, and it is said were highly respected citizens.

School Directors Meeting.

Wednesday, June 20th, 1883.
Present—Strahan, Montanye, Monteth and Clerk, J. H. Burkhardt.
The following bills were ordered paid: J. D. Robt, \$120; V. M. Kane, \$50; Rova Alexander, \$50; E. M. Turrell, \$50; N. Sparks, \$50; Minnie Allison, \$50; O. T. Porter, \$250.

The following resolution was passed. Resolved, That Prof. J. D. Robt be employed as Principal of the Public School for the ensuing year, also, Miss Kane, Miss Allison, Miss Sparks, Miss Alexander and Miss Elie McKee be employed as Assistants, at the same compensation as has been paid heretofore.

On motion the board adjourned.

A Big Fish & Race on the 4th.

One of the biggest attractions on the 4th will be a race between Hook & Ladder Co's. A prize of at least \$50 will be offered for the company running two hundred yards and getting a man to the top of a thirty foot ladder, first. We understand that the Salem, Corvallis and Independence boys have agreed to enter. If the race will be one of the most exciting features of the day's proceedings, and will help to make this the grandest 4th yet held in Albany.

The Cemetery.

The Board of Directors of the Cemetery association met the first of the week at Burkhardt Bros. office and fixed the following schedule of prices for blocks and lots in the southern addition: Blocks, \$30; lots, \$15; and quarter lots along the south line \$7.50. Lots will be held in any case, except the quarter along the south line. A map of the lots has been made and is at the office of Burkhardt Bros. where it can be examined. The ground has been placed in splendid condition, and lots can be had at any time.

Mask Skate.

Next Tuesday evening the Star Skating Club will give a mask skate at the hall under Sanders & Sorenberg's store. Those desiring to see some fun should make it a point to be present. Tickets for spectators for sale at the usual prices.

HOME AND ABROAD.

We Pick Up Numerous Items This Week.

F. M. French, jeweler, New lace at Monteth & Seitenbach's. Albany also has some "moose-hacks." Monteth & Seitenbach have an endless variety of corsets.

Henry Ward Beecher is to be here this summer. Sad news.

Ten or fifteen new houses, we understand will be built in Seio this fall.

It will pay you to call and see that Faultless Parlor table at Tweedale's.

A kitten in this city has already been named Francis Annie Gordon Willard.

Several Albany ladies went to Corvallis Tuesday evening to hear Miss Willard.

A box of camp pens at this office, quilting with fountain quill pens for \$1.50.

Quite a number of our firemen will attend the firemen's picnic at Corvallis to-day.

Bridgeford & Beard at Seio will sell you anything in the grocery line at lowest prices. This office acknowledges the receipt last week of a very fine bouquet from the W. C. T. U.

Don't forget that W. C. Tweedale is agent for the Celebrated Melalion Cooking Range.

The fare from Portland to Chicago over the N. P. R. R. will be about \$132. This is too much.

A party starts for Mary's Peak in a few days, and proposes to camp for awhile on its rocky top.

Ladies! Try a pair of those new stylish kid gloves for sale at Monteth & Seitenbach's.

Croquet is being played considerably. Probably there is no game that engenders more disputes.

The Portlanders defeated the Stars last Sunday 11 to 7, a very good game. This is the Stars first defeat.

Rev. Henry, of Eugene City, was very ill last week and not expected to live, but we are glad to hear, it is improving.

Our friends in and about Seio should call upon Montgomery & Dilly for clocks, watches and jewelry or for repairing.

A few days ago we noticed a new stylish kid glove for sale at Monteth & Seitenbach's.

Monteth & Seitenbach have a fine stock of gents' and boys' clothing and invite the trade to call and examine them.

Dr. Ed Geary has lately performed a difficult surgical operation in Southern Oregon, which is giving him a good reputation.

We are under obligations to our friends in Seio, who bestowed so many favors upon us during our recent visit to that town.

President Julius H. Seelye is to discuss "Dynamite as a Factor in Civilization," in the July number of the North American Review.

Mr. Peter Callahan is clerking for A. B. McIlwain, Pease is a popular clerk and Mr. McIlwain has done well to secure his services.

When the Portland News shouts for such men as Dick Geary it loses credit with the best class of people and does not deserve their patronage.

Geo. W. Harris is constructing a building for a marble shop on Ferry Street, opposite the post office. It is an excellent location for any business.

It is understood \$100 will be given for evidence of the person poisoning a man who died here. Here is a chance for some one to earn a straight hundred.

Anyone wishing to purchase a pair of good naves or a pair of good horses would do well to call upon A. Humphrey living four miles west of Lebanon.

W. H. Talcott, of Seio, sells dry goods, clothing, boots, shoes, groceries, etc., at most reasonable terms. Folks in the Forks should not fail to call on him.

Large numbers of our citizens went to the camp meeting at Roberts Bridge and to So. Davis last Sunday, notwithstanding the amount of dust in circulation.

Robt. L. McKee and not E. D. McKee is to deliver the address here on the 4th. They are brothers, but even then they may not wish to get their names mixed.

The little village of Grants Station, a few miles from The Dalles, was nearly destroyed by fire Monday night. The total loss is between \$150,000 and \$200,000.

Look out for picnics. They begin to fall on every hand like a winter shower. Many are the hearts which will be smashed to atoms during the coming summer.

Figures compiled from the Bureau of Vital Statistics show that more marriages occur between the ages of twenty and twenty-five than any other age.

The Roseburg Plaindealer says "what many of its citizens meet now is two more lengths of 50 foot stockings" or words to that effect. What does it mean?

A week ago last Sunday a foot race was run at So. Davis between a son of a Benton county minister and a young man from Seio, for \$40. Linn county came out ahead.

The people of the Forks can always find the best stoves, tinware, copper and sheet iron ware, etc., at W. M. Morrow's, Seio.

Dick Geary seems to have run the Portland election. That city has reason to feel proud of itself for being pulled by the nose by such an element as Geary represents.

Linn County is going for rain. How soon it will come we cannot say, but certainly if it can get the wheat to keep up courage till the 7th, we'll be sure to get it then.

We have a young man near this city who runs 100 yards in 9 seconds, at least this is stated on pretty good authority. We understand he is ready to run any one in the valley.

The State Teachers' Association meets in Salem, June 27, 28 and 29. The program is a very interesting one, and all of Linn county's teachers should try and be present.

Get your groceries at Hoffman & Joseph's and while you are getting, remember that they keep soda water, Waterbury and Solvayville, and local drinks of numerous kinds.

The Walla Walla Watchman says there are eight regular, nine homeopathic, five eclectic, and thirty-nine physicians of unknown schools of practice in Washington Territory.

The residence of J. H. Burkhardt has been placed in nearly its former position and when the whole is repaired will be as nice looking as any residence in the eastern part of the valley.

A subscriber wrote to the Yaguna Post: "I don't want your paper any longer." Van Cleve answered him by this: "I would not make it so if you did. It would involve a new press."

The printers of Portland held a picnic last Sunday. Among the prizes awarded was one for the following, which we copy verbatim: "The printer who thinks he is the handsomest—Pottinger."

Allen & Martin keep constantly on hand an endless variety of corsets. The "everlasting," "unbreakable" and "corduroy," the three best corsets made, always in stock. A new lot of young men's suits just received at E. L. Mann's. As the 4th is only

on or twelve days away all should hurry up and dress themselves for the grand occasion. Queen Victoria is to abdicate, and we are sorry, for we consider her far ahead of that son of hers, the Prince of Wales. We never did like the Prince, and it grieves us terribly to know he is to wear the crown.

The next State Firemen's Tournament is to be held in this city in August of next year. It is to be hoped that by that time Albany will be in a condition to raise a respectable purse for the occasion.

The assistant County Surveyor Fisher, is in Seio, mapping out the new addition to that city. The location is a fine one, and while the lots will not have an Albina boom they no doubt will have a fair sale.

Last week Walter Root came very near being kicked to death at Corvallis. We were afraid when he wrote "Ivanhoe" that if he kept up some of those boyish tricks he would get into trouble. Poor Walter.

The working of the Magnolia Mills into the new process is being pushed rapidly. When completed there will be as complete as any mills in the State. The work is being done by the best workmen, insuring a first-class job.

Rev. Dr. Marvin, the well known Congregational minister of Portland, will preach in the Congregational church in this city next Sunday morning and evening, and his pulpit in Portland will be supplied by Rev. Harris, of this city.

See that your mortgages are satisfied. The records are now being examined, and where mortgages are not satisfied, he believes mortgages to be made, it is all right on the mortgage, he may have to pay on property he does not own.

We are sorry that we cannot attend all the picnics being held this week, but it is absolutely impossible to be at Knorr's Butte, Corvallis, Oakville, Pumpkin Ridge and Shady Hollow all the same time, so we will go where we can get the most kax.

We are glad to be able to report that our public schools during the coming year will be under the same splendid management as during the past year, except that Miss Emily Turrell has resigned and Miss Elia McElride, of Portland, has been appointed in her place.

The game of ball on the 4th will be played on an arena in the eastern part of the city on the corner of Third Street and the Santiam Canal. The grounds will be put in good condition, and as they are near the grove no more convenient place could be obtained.

Noticeable improvements are going on in the eastern part of the city. Besides small matters not particularly worth mentioning, Mr. Ad Harmon is building a residence on First Street, which, though not large will be a very neat dwelling house and a pleasant home.

There will be a picnic at Knorr's Butte next Saturday, and no doubt it will be the biggest affair of the kind ever held there. Six schools have united and are making arrangements to have this the grandest time yet heard of. Quite a number from this city will attend.

By reference to the county court proceedings it will be noticed that a large number of contracts were let for the building and repairing of bridges, something absolutely necessary, so that if it takes some money Linn county people will know that it has gone for a good purpose.

A few days ago Capt. Shiede purchased one of the famous Mathushek pianos of J. H. Daniel, in this city, and now this splendidly toned piano, at the hands of the Captain's accomplished daughters is furnishing some of the best music to be obtained for his household and intimate friends.

The Telegram says Fred Brickelman was killed at Albany by falling timbers, but as we have heard nothing about it, suppose Albina is meant. If this confusion continues we propose to get an injunction out restraining the use of the name Albina. It is a matter of considerable annoyance to have men killed in Albina.

Two weeks ago we told of three of our citizens catching 300 trout in one day, it was a big story for this time of the year, but the editor of the Nelson Leader has taken down his little hatchet and says two fishermen of Corvallis caught 413 in one day last week. With such a neighbor we shall not go more fish stories.

A big picnic will take place at Hamilton Grove near Oakville, to-morrow (Saturday). It is gotten up by five schools, and we understand will be a lively affair for the people around Oakville. Albany people who wish to spend a pleasant day can not do better than to go to this picnic.

And Hoffman & Joseph have just put up one of the prettiest glass washers one often sees, only the washer part never came with it. A beautiful maiden sports in the gentle shower that are sent up from a fountain, clash against the glass globe, and then fall like an Oregon mist on her beautiful form, so much like the typical Oregon mist. It is a thing of beauty and something everybody should see.

Last Saturday Mr. A. L. Bridgefarmer came into our sanctuaries with some cherries which will bear comparison with any we have seen. They at least were greatly relished by the DEMOCRAT'S. The cherries were grown on a tree two feet in diameter with branches spreading 27 feet. An eye accompanied them, which were able to distinguish by its color and shape. It measured 64 by 73, and is a fair egg-shaped of the way Mr. Bridgefarmer raises them.

The children of the public schools held picnic at Hacklemann's grove last Tuesday, which was a very enjoyable affair for all who attended. It would be impossible to enumerate all the tricks resorted to to increase the joyousness of the occasion, nor to tell of the innumerable side glances cast, nor of the amount of pickles and biscuits consumed at the proper time. The last day of school is a great day and one which fills teachers and pupils alike with strange sensations.

Elder S. C. Adams, of Salem, filled the Christian pulpit in this city last Sunday, both morning and evening, and preached two very able sermons. It is not generally known, and yet is conceded by many who may be considered authority in regard to the matter, that this gentleman has no superior if an equal in the United States as an eloquent theologian. His sermons were so good that he has been sold in every quarter of the globe, has never been equal for historical facts.—Cor. Oregonian.

Man has many enemies, the Scientific American, says particularly thirteen. In order that the DEMOCRAT'S readers may appreciate the greatness of some of these enemies and be on their guard, we give two, which everyone will understand at a glance. Micrococci. Cells globular or oval elliptical, motionless, isolated or united in chains. These embrace pigment forming micrococci, 7 species; fermenters, 4 species; disease germs, 11 species; doubtful species, 10. Acoecous. Cells globular in irregular groups, often lobed and enveloped by a capsule of firm jelly; this genus contains one species.
