BILL NYE ON MAINE.

The farms in Maine are fenced with stone walls. I do not know why this s done, for I did not see anything on these farms that any one would naturally yearn to carry away.

I saw some sheep in one of these inclosures. Their steel-pointed bills were lying on the wall near them, and they were resting their jaws in the crisp, frosty morning air. In an other inclo-

"Oh, Lord," exclaimed a devoted brother on a back seat, "hit 'im again !" There are many buman tabornacles which are in sore need of radical building over, but we putter and fuss and repair in spots without satisfactory results. It is only when we personally alarmed at the real danger that we act independently, and do the right thing. Then it is that we most keenly regret because we did not sooner use our judgment, follow the advice born of the experience of others and jump away from

Thousands of persons who will read this paragraph are in abject misery today when they might be in a satisfactory condition. They are weak, life less, full of odd aches and pains, and every year they know they are getting worse, even though the best doctors are patching them in spots. The origin of these aches and pains is the kidneys and liver, and if they would build these not to be used in the administration of all over new with Warner's Safe Cure as millions have done, and cease vesting their money in miserably unsuccessful patchwork, they would be well and happy and would bless the day when the Lord "hit 'em" and indicat-
