

IGNORANT.

A man who thinks he knows all about the tariff and who writes under the cognomen of "School Boy" in the Corvallis Gazette of last week asks: "Upon what authority is the statement made that the agricultural products of this country are not protected by the tariff, but are compelled to compete with the pauper labor of all other nations?"

Our "School Boy" asks again: "If protection creates high prices and fosters monopolies, why are our manufacturers protected as cheap, if not cheaper, than at any other period since the formation of the government?"

There are about nine hundred Indians on the Reservation, which was shown by the census of last year. They are of five different tribes, namely, the Warm Springs, Wascoes, Putes/Teninoes and John Days. The Warm Springs are the Indians who were next to be placed on the Agency number about 400.

In regard to the schools, there are two, one at the Agency and one twenty miles distant, which is principally for the Warm Springs, as they do not like to mix and mingle with the other tribes. There are 216 children between the ages of 6 and 16. The schools are boarding schools. The employes of each school are, teacher, salary, \$300, industrial are, \$800, matron, \$480, seamstress, \$480, cook, \$320, W. H. Brunk, formally of Albany, is teacher at the school twenty miles away.

"School Boy" again asks: "If the manufacturer grows rich under protection, why have so many become bankrupt within the last two years, and why have so many factories been either compelled to shut down entirely or to run on one-half or one-quarter time?"

The goods received from the Department for this year are arriving now. They consist of about twenty-five four horse loads from The Dalles. The goods are issued to the Indians, with the exception of wagons, harness and plows, which are sold to the Indians at auction, and paid for in work, such as freighting, etc.

The authority which governs the Indians consists of eleven police, three of whom act as Judges. They try all cases of misdemeanor, and say what the fine shall be. The Agent has the right to take exceptions to any of their rulings. The salary of the police is \$12 per month for the three Judges, and \$8 for the privates. They have the same right to make an arrest that a Constable does, and any one resisting an officer is punished. They wear uniforms and badges.

In regard to farming, Indians farm on a small scale, some not farming more than one or two acres. Of course there are a few exceptions. Some few may have as much as ten acres. The soil is very productive. In small tracts along the creeks the Indians raise nice gardens with little work. They seem to like stock raising better than any other industry, as there is little labor attached to it, but the snow of last winter killed a large number of their horses. It is estimated about 3000 head died from starvation.

The Indians are making more preparation for winter this fall than ever before. Some have small stacks of straw and hay for winter. The government furnishes tools for them to work with, and all the work about the Agency that they can do, they are given the preference. There is considerable more work around an Agency than one would suppose. The mail is received here three times a week. It is from Hay Creek, on the Prinsville and The Dalles road. There is talk of a line of stages being established between Prinsville and The Dalles by way of the Agency, as it is a nearer route.

THE REASONS. The reasons the Democrats were defeated in Ohio were, first, that Ohio is naturally a Republican state by 25,000 majority. Second, that while the Republicans were divided on the liquor question, the course of Gov. Hoadley in the canvass divided the Democrats on the same question and caused the Democrats to lose about as many votes as the Republicans did. Third, that while it must be true that John Sherman's course in appealing to sectional hate to arouse Republicans lost that party many votes without gaining a single one from the Democrats, yet this advantage was fully overbalanced by the factional divisions among the Democratic leaders of the state. The facts show that both parties in Cincinnati, Columbus and other places attempted various schemes of fraud, which set each equally back in the estimation of all good, law-abiding citizens. We are not of those who believe that Democratic dissatisfaction with Cleveland's administration had any important bearing on the result. Of course there are disappointed Democrats who may have voted against the Democrats because they have failed to obtain positions under the new administration, but this number is few and of comparative little influence.

WARM SPRING AGENCY.

October 20th, 1885. Thinking a few lines from this place might be of interest to your readers, I will endeavor to give you a brief description of the Agency and the business connected with the same.

There are about nine hundred Indians on the Reservation, which was shown by the census of last year. They are of five different tribes, namely, the Warm Springs, Wascoes, Putes/Teninoes and John Days. The Warm Springs are the Indians who were next to be placed on the Agency number about 400. The other tribes are stragglers that came here of their own accord. Three languages are spoken on the Reservation, the Wascoes, Teninoes and John Days speaking the same language. The Warm Springs and Putes each have a language of their own, although some of the Wascoes speak the Warm Spring language.

In regard to the schools, there are two, one at the Agency and one twenty miles distant, which is principally for the Warm Springs, as they do not like to mix and mingle with the other tribes. There are 216 children between the ages of 6 and 16. The schools are boarding schools. NOVELLES.

Oak Creek.

The Utopian club which has been adjourned since last spring will reopen next Saturday evening Oct 21st. The first meeting will be held at Mrs. Bodine's house.

School is progressing finely, in district No. 16, with a daily average attendance of 81 pupils. Last Friday was examination day, it being the end of the first month of the present term. Those of the pupils who passed above 90 per cent, in all of their studies were, Alie Auderway, Lonie Green, Winnie Nichols, Alma Auderway, Lian Gay, Kittle Green, Ralph Knapp, Rozella Fry, Ella Foster, Harry Hunter, John Hunter, Cora Gay, Minnie Fry, Clyde Knapp, Samuel Wickizer and Leona Wickizer. Those neither absent nor tardy, during the month were Harry Hunter and Sammy Foster.

EXCERPTA.

Rock Hill.

We know that the Rock Hill school is progressing finely under the fine management of J. E. Eastman. The scholars seem to be well pleased with him.

And we know that the rainy season has set in, by the way the weather looks.

We do know that the fall wheat looks fine in these parts. Prospects are good for a good crop next year.

We know that Hiram Kium has a No. 1 hotel at Sodaville and he and his estimable lady deserve a good patronage. We hope he will have good success in his undertaking. We know that the crowds are small at Sodaville on account of the weather being too rough, although the soda-water is strong and good as ever, and we know that there are going to be two or three weddings come off in or near Sodaville in the near future.

James Stimson and wife are visiting at his mother's in Rock Hill where they will move in a short time from near Shedd station.

We know that when the tide comes in the waves will roll on.

And we know it is getting late in the season for Sunflowers and Rosebuds, but nevertheless they will be in bloom all the fall, for there has been no frost to wither their heads.

Business is looking up a little in Lebanon. The price of grain is coming up. Wheat at the warehouse is 63 cents per bushel and oats up to 50 cents per bushel, at Donnan's warehouse.

Harry Smith has rented the Jim Coffelt place, so we are told.

We notice Charles Hinkleman is doing a rushing business in his grocery store, and also C. M. Talbot has a neat little store in Lebanon.

There was a man by the name of William Griddle we noticed in Lebanon the other day, canvassing for an interesting book, and as to whether he got any subscribers or not we do not know.

Robert Nickels had arrived safe across the mountains when last heard from.

We know that the health about Rock Hill is exceedingly good for the time of year.

We do know that John Chinamen will soon get out of Oregon if the white men will stop hiring them; but as long as the white men give them employment there is no use in trying to get rid of them. We say, let them go to their native land and stay there.

We know that the Rock Hillers tried to get up a nice little party; but it was a fizzle.

A ROCK HILLER.

Halsey.

The new instruments for the Halsey brass band came yesterday. They are said to be very good. The band expect to engage Prof. Sibbet of Shedd as teacher.

The long looked for rain is here at last. The Farmers can prepare for another crop.

Wheat is selling slowly. 63 cents is offered at this place.

The infant child of D. M. Cooper, died on the 23rd inst.

Mr. and Mrs. Fields of Mt. Tabor are visiting with their son at this place.

Miss Emma Duncan, of East Portland, is visiting relatives in town.

Morris Island.

Some time ago I was sitting at work when my attention was called to a noise at the gate. I looked out and saw what at first reminded me of Darwin's theory of the human race; but when it approached a broad grin spread over its countenance, I recognized an old friend, the original Pond Lily, but looking more like a witted pumpkin blossom than a lily. Soon after a large bird was seen following in said Lily's wake, but keeping at a short distance from the house, till Lily started back to Beaver Creek, when it came as before stated, lit on the house, spread its

A SCIENTIFIC FACT.

"Royal" the only Baking Powder free from Lime and Absolutely Pure.

Lime is the serious defect found in most of the cream of tartar baking powders. As a matter of fact, chemical analysis has found it in all such powders except the "Royal." Its presence is caused by the use of adulterated cream of tartar in the effort to reduce their cost of production.

Lime adds to the weight while it detracts from the strength of the baking powder. It also renders the food less wholesome, giving rise to dyspepsia and kindred ailments. Baking powders containing lime produce less leavening gas, and therefore in use are more expensive than a first-class, pure article.

The Royal Baking Powder is made from cream of tartar that is first specially refined and made chemically pure. No tartrate of lime or other impurity can find its way into the "Royal," and to this fact its great superiority in strength, wholesomeness, and keeping quality is due.

All this adds greatly to the cost of manufacturing the Royal Baking Powder, but as all its ingredients are selected and prepared with the same precise care and regardless of labor or expense, an article is produced that is free from every extraneous substance—"absolutely pure." Nor does it contain any ingredients except those necessary to make a pure, wholesome, and perfect baking powder.

Professor McMurtrie, late chemist in chief to the U. S. Department of Agriculture, after analyzing the various baking powders of the market, testifies to the absolute purity of that used in the Royal Baking Powder as follows: "I have examined the cream of tartar manufactured by the New York Tartar Company and used by the Royal Baking Powder Company in the manufacture of their baking Powder, and find it to be perfectly pure, and free from lime in any form."

"WM. McMURTRIE, E.M., Ph.D., "Chemist in Chief, U. S. Dept. of Agriculture."
