SAVE THE CHILDREN.

Detrimental food which, by reason of their superior strength, may not seriously affect the health of adults, as is well known, frequently acts upon the more delicate organs of the child to produce disorders of the most serious character. The amount of laudanum of other peison that would be harmless to an adult will cause the death of an infant. This great difference between We append the bill passed by Con the vitality of adults and children is gress, as we have had many requests too generally overlooked in the preparation of food. Because no barm immediately perceptible comes to the adult by the use of an article of food, no thought is given to the effect it may have upon the more delicate organs of inferior age.

Children diet, largely upon cake and

and composed of materials that are free from injurious substances, are easily digested, natritious and wholesome. There is a danger to our children, however, lurking in their bread and cake which is too often lost sight of. These articles are now leavened largely by baking powders, and when pure and whelesome baking powders are used they make not only the most palatable feed, but one much more wholesome and nutritive than if leavened with yeast or cream of tarter and sods. The trouble arises from the fact as shown by recent scientific tests by the Government chemists and by official boards of health, that all these baking powders, with the single exception of the Royal, contain either lime, a.um, phosphates or acids of an injurious character. Therefore when bread or cake is made schools, and by all pupils in all said ders these ingredients (which are presschools, throughout the territories, in the ent through the efforts of the manufacmilitary and naval academies of the turers to produce a cheaper article) pass United States, and in the District of into the food and are taken into the Columbia, and in all Indian and colored delicate organs of childhood where they schools in the territories of the United are the source of very much of the dis- is no flatterer. # A Safeguard.

The fa'el rapidity with which slight Colds and Coughs frequently develop into the gravest maladies of the threat and lungs, is a consideration which should impel every prudent person to keep at hand, as a household remedy, a bottle of AYER'S CHERRY PECTORAL.

Nothing else gives and impediate relief Nothing else gives such immediate relief and works so sure a cure in all affections of this class. That eminent physician. Prof. F. Sweetzer, of the Maine Medical School, Brunswick, Me., says:— "Medical science has produced no other sno-dyne expectorant so good as AYER'S CHERRY PROTORAL. It is invaluable for diseases of the throat and lungs."

The same opinion is expressed by the well-known Dr. L. J. Addison, of Chicage, Lii., who says :--"I have never found, in thirty-five years of continuous study and practice of medicine, any preparation of so great value as AYEN'S CHERZY PECTORAL, for treatment of diseases of the throat and lungs. It not only breaks up colds and cures severe coughs, but is more effective than anything class in relieving even the most serious bronchial and pulmonary affections."
